

Managed Solr Cloud for Sitecore - Scalable, Resilient, and Managed

About Managed Solr for Sitecore:

Specializing in Azure PaaS and website deployments, we offer cloud solutions to optimize web operations globally. Within that we built a Managed Solr Cloud offering for Sitecore customers.

What we offer

Unlock the potential of enterprise search with Managed Solr Cloud for Sitecore, a pioneering platform engineered for excellence in search capabilities. This solution is not just a search engine; it's an advanced, distributed search system tailored to meet the evolving requirements of modern data management and retrieval.

- Distributed Architecture: Ensures high availability and fault tolerance across multiple servers.
- Autoscaling and Resilience: Maintains optimal performance and continuous operation.
- Secure and Controlled Access: Robust authentication, authorization

Managed Solr Cloud for Sitecore sets a new benchmark in search technology, combining scalability, flexibility, and security to deliver an unmatched search experience that evolves with your business.
