

Admin in a Day

Effectively manage Power Platform to gain better results

New to the Power Platform? Looking to secure and govern the platform before too many apps and flows are created? This is the workshop for you!

Learn how to create PVAs, with our hands-on 'Power Virtual Agent in a Day' 1 day instructor-led workshop.

Admin in a Day is one element of CPS' Power Platform Enablement Services and equips participants with an understanding of managing Power Apps and Power Automate including architecture overview, security considerations, licensing, monitoring, alerting, and application lifecycle management.

CPS offers an introductory instructor-led hands-on workshop to learn the best practices for management and governance of Power Apps and Power Automate.

Security and Administration

Learn the best practices on how to manage and monitor Power Apps and Power Automate.

Drive Adoption

Have the confidence to get ahead of adoption in your organisation and proactively establish policies.

Empower Admins

Dive into the Power Platform Admin Center and COE Starter Kits tools Microsoft has provided to empower admins and how best to use them.

Agenda

- Understand the basics of security and administration.
- Monitor through reporting and telemetry.
- Alert and action through automation.
- Application lifecycle management and app deployment.
