Microsoft Priva - Privacy Risk Management.

With organisations increasingly concerned about how private data is held, a "privacy by default" posture is essential. Understanding rules and regulations for how organisations should store personal data, and how to make personal data accessible to those who have the right to access it has never been more challenging. Manual processes and disparate third-party tools can be time consuming and confusing.

With **Microsoft Priva – Privacy Risk Management**, CPS can empower your organisation to meet these challenges and:

- Safeguard data from privacy issues such as data transfers, data overexposure, and hoarding
- Monitor data based on sensitive information types or classification groups
- Take action on insights and policy matches using supporting Microsoft 365 compliance tools such as data loss prevention, sensitivity labelling, and retention labelling

Microsoft Priva – Risk Management enables organisations to manage privacy risks at scale with detection technology, and policies and processes for remediation to make a positive impact to your organisation's privacy posture.

Discover & remediate over-privileged personal data	Microsoft Priva integrates with Microsoft 365 compliance tools to assess privacy & protect data corresponding to industry standards

CPS - Privacy Management Service

CPS' Microsoft Priva – Privacy Management service is designed to define your organisations strategy to detect and remediate the risks associated with holding personal data. Our Microsoft Certified team works with your Business, IT, and Compliance teams to:

- Gain visibility on storage of personal data across services such as Exchange, OneDrive, Teams and SharePoint
- Empower your organisation to protect against privacy risks with insights and policies
- Take action on insights, alerts, and policy matches using supporting Microsoft 365 compliance tools
- Enable employees to make the correct data handling decisions

What's included:

- Key Insights on personal data
- Data profiling
- Default Policies
- Custom Policies

> An effective modern privacy management strategy is essential to any organisation holding or processing any personal information, to ensure best practice and compliance with industry regulations such as GDPR.
> - **Peter Rising, MVP & Head of SCI, CPS**
