Microsoft 365 Security, Compliance & Identity Fundamentals .

The modern threat landscape means that it's never been more important to protect your cloud and hybrid infrastructure. Cyber criminals and nation-state bad actors are becoming more sophisticated. They are determined to gain access to critical and sensitive information within businesses and enterprises, creating chaos and disruption with malicious code and ransomware.

You need to act quickly to protect yourself, deploying modern (SCI) principles including: Zero Trust, Risk Management and Information Protection. CPS will help you, through a progressive consultant-led approach, to maximise adoption and deliver a successful and secure deployment.

Introducing Microsoft 365 SCI Fundamentals.

Implement a starter set of baseline Security, Compliance, and Identity settings and policies to kickstart your cyber security posture.

This engagement is for new and existing Microsoft 365 users of all sizes to define your modern Security, Compliance and Identity posture. We help you to begin your journey by:

- Understanding your Secure & Compliance Score and provide recommendations
- Establishing Identity as your modern security trust fabric
- Review and provide reccomendations for baseline policies and settings
- Review and provide recommendations for baseline compliance policies aligned to company policy

CPS' Microsoft Certified team works with your IT and Security & Compliance teams to ensure that you:

- Comply with internal policies and industry regulations
- Protect your sensitive data from loss and leakage
- Secure your identities with modern authentication

What can be included

Security
- Stop breaches across your entire organisation
- Mobile device management with Intune
