# Modern **Cybersecurity** demands 24x7 visibility, automation, and expert response

**A Fully Managed XDR Service Built on Microsoft Defender—Tailored for Fast, Efficient Security Operations**

**CPX M-XDR** empowers organizations to operationalize Microsoft Defender and Security analytics through a Managed XDR service tailored to your needs.

- Microsoft-native XDR + Security Analytics + optional VM/NDR
- UAE-based SOC and threat intelligence
- Co-sell ready with Microsoft

# The **Problem** We found

And **CPX** approach to **solve it**

## Issues Normally faced by Security Teams.

Too many alerts, not enough context

Shortage of skilled SOC personnel

Underused Microsoft Defender/Security Analytics

Gaps in threat visibility and response speed

## How **CPX** address this issues?

With a Modular, Scalable, Microsoft-aligned approach

1

Built for Microsoft 365 Defender, Security Analytics, Defender for Cloud

2

Co-managed model in customer tenant

3

Automated playbooks + human-led response

4

Multi-tiered to support security maturity

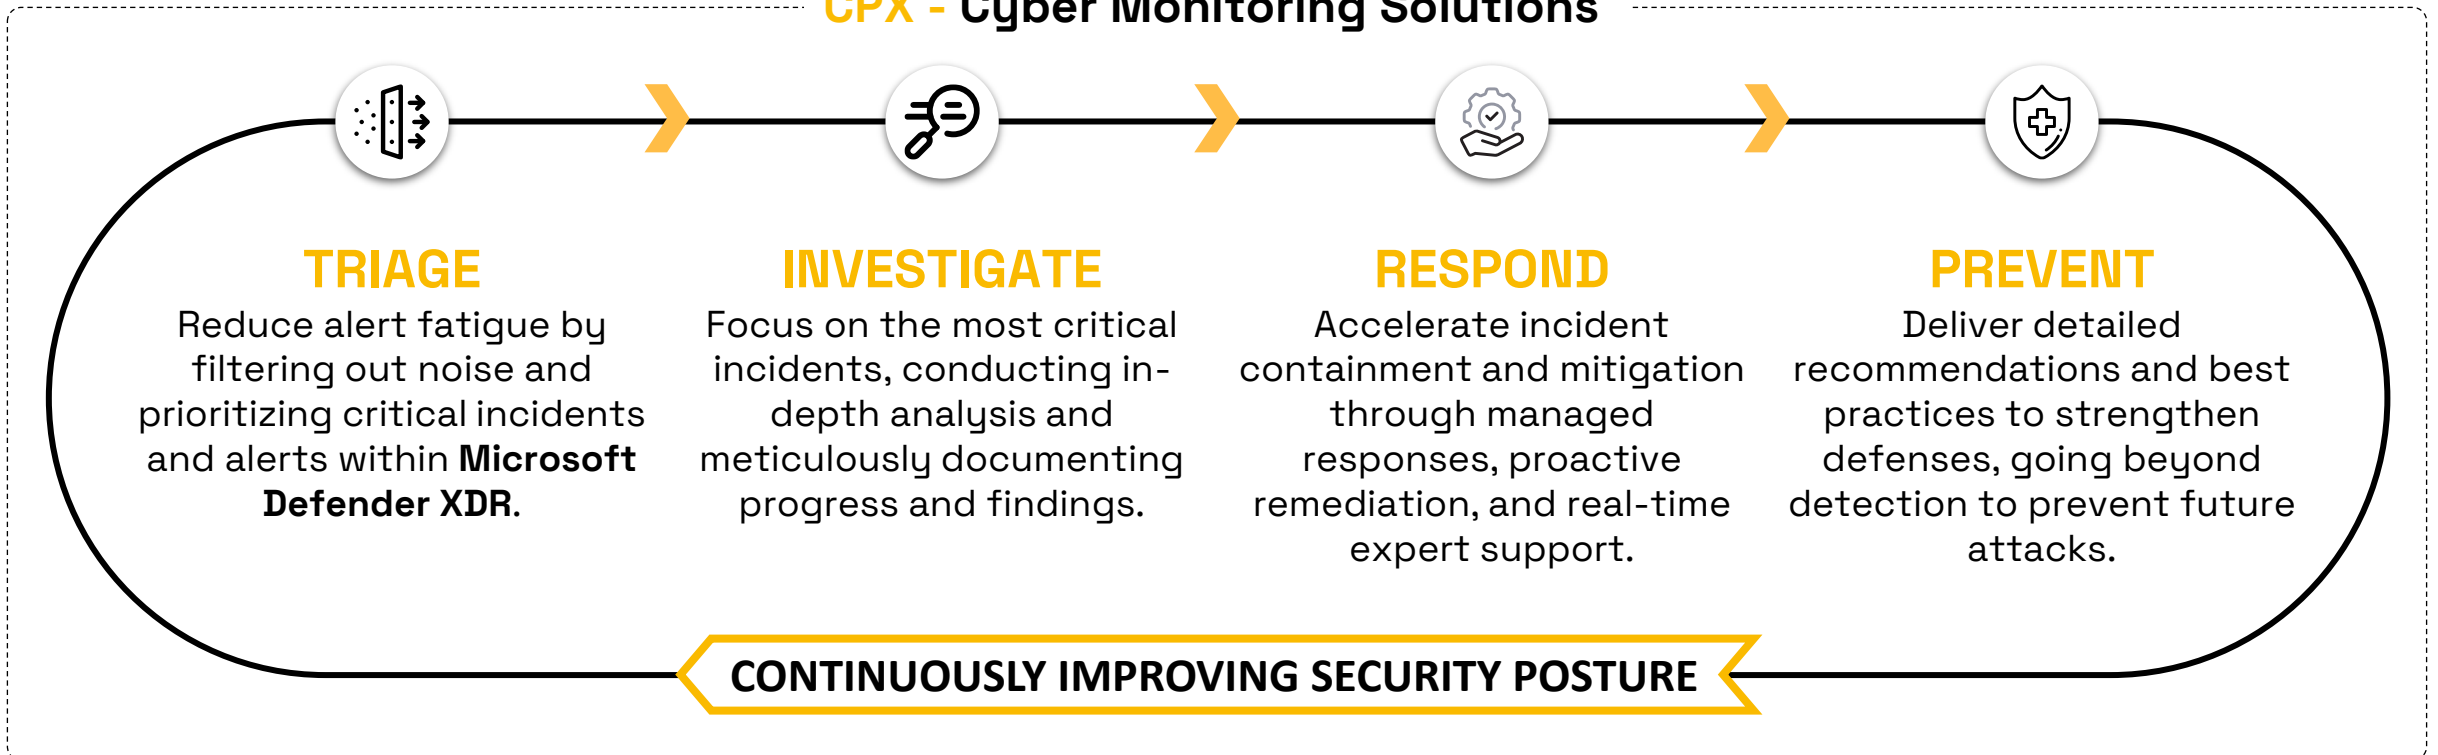

# CPX M-XDR for Microsoft Security Stack

Scalable Security Solutions for Enhanced Cyber Resilience

**CPX** offers **fully managed** and scalable **cyber monitoring solutions**, leveraging **Microsoft Security tools** to deliver comprehensive **threat detection, analysis, and response**. Our solutions ensure ease of scalability and enhanced visibility, available through the **Microsoft Azure Marketplace**.

## CPX - Cyber Monitoring Solutions

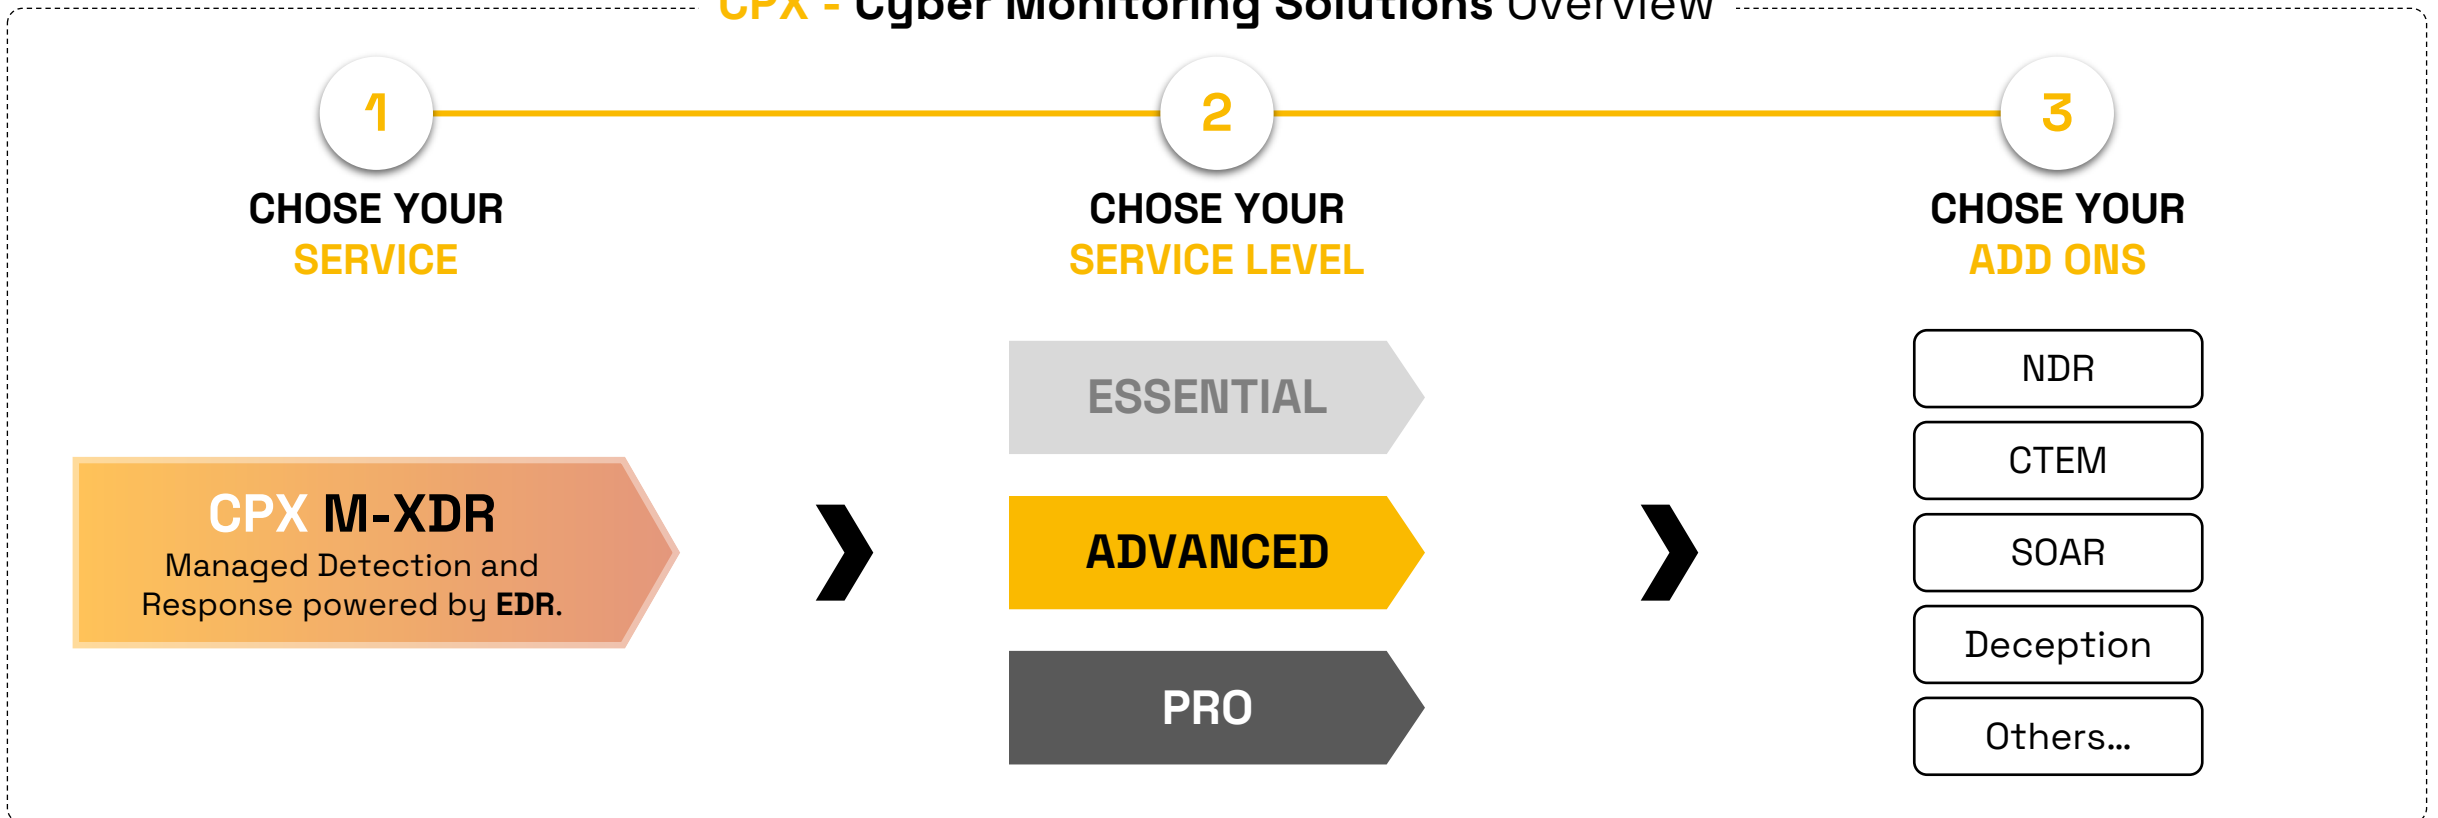

# CPX M-XDR for Microsoft Security Stack

Scalable Security Solutions for Enhanced Cyber Resilience

**CPX** approach provides a flexible, tiered security solutions designed to strengthen clients' cybersecurity postures, catering to various **maturity levels** that can be offered using **CPX** or **Client Azure tenant**.
