Trisus® Supply

If your hospital or health system isn't receiving all the reimbursement it legitimately should for medical/surgical supplies, it's almost certainly because supply charges aren't captured and billed correctly.

The underlying cause is usually disparity among the purchasing, item master, OR, and billing systems – and the resulting lost or incorrect data leads to a loss of revenue in the supply chain.

Unlock the Benefits of Trisus® Supply

Improve Reimbursement

Maximizes
supply charge automation for **timely reimbursement**

- Ensure timely and compliant reimbursements by reviewing supply coding issues
- Update item master supplies successfully to OR Supply System
- Unlock visibility into the last purchased cost versus Item Master cost

Improve Compliance

Enhances
compliance for claim precision to **optimize reimbursement** and **reduce denials**

- Correctly associate charge codes to supplies that are billable
- Find potential lost revenue for reimbursable supplies linked to patient charges
- Prevent inaccurate billing, as well as improper HCPCS and revenue code assignments

Defensible Pricing

Ensures
cost to charge accuracy for **pricing transparency**

- Provide instant visibility into the Item Master supply costs against the set price in the chargemaster to support pricing policy decisions
- Identify supplies that are currently purchased not contained in the Item Master
- Prevent potential utilization of non-contracted vendors at non-negotiated costs

---

In a sample of hospitals ranging in size from **200-3,000** patient beds, **Trisus Supply**

identified a potential gross impact of

$2,540 per bed

Documented Outcomes in 4 Non-profit Hospitals

West Coast	310 Bed	Northeast	725 Bed	Southeast	2,706 Bed	Mid-Atlantic	194 Bed
Annualized Financial Impact **$258,274** potential gross total *46 issues fixed*	**Annualized Financial Impact** **$1,998,087** potential gross total *1,765 issues fixed*	**Identified** *28,680 missing Item numbers*	**Annualized Financial Impact** **$794,900** potential gross total *90 issues fixed*
Identified *8,839 potential issues* between Item Master and CDM	**Lifetime Financial Impact** **$5,156,394** potential gross total *3,019 issues fixed*	*7,757 Implants and devices* that are *missing* the recommended HCPCS	**Lifetime Financial Impact** **$4,841,552** potential gross total *697 issues fixed*

> " *Trisus Supply helps to identify supplies that need to have service codes, so our facility is not missing out on reimbursement! We have been most successful identifying service codes missing HCPCS codes, assisting our facility to maintain our most current pricing per our policies.*"

> "*Gaps identified within the interface process between Item Master and OR – surgery specific supplies were not visible for purchasing and charging in our OR operating system. Trisus Supply Craneware status and HCPCS recommendations ensure that our Item Master is accurate and up to date.*"
