

Trisus® Claims Informatics Success

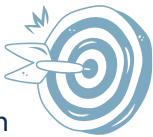

Uncover Hidden Revenue.
Strengthen Compliance. Drive Results.

Trisus Claims Informatics finds what others miss—maximize revenue, strengthen compliance, and improve operational efficiencies through innovative, post-bill charge capture data analytics

Big Impact, Fast Results

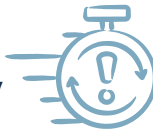

94%

Financial goal met in 4 months with Cerner/Soarian

\$1M+

Missed charges flagged by Trisus Claims Informatics, not other tools

\$391K

Found in just 3 training days – OR implant rebills

\$480K

From 1,200 cardiology claims

\$450K

Identified in just 500 claims post-training

How We Deliver Impact

Error Detection & Correction

Flags missed, incorrect, and non-compliant charges, documenting and tracking corrective actions to stop the errors

Claim-Level Precision

Detects issues missed by pre-bill claims processes

EHR Coverage

Uncovers build deficiencies across Epic, Cerner, and Meditech

Team Collaboration Gains

Breaks down silos, improves accountability

Lean Process Integration

Speeds policy updates & review cycles

Actionable Insights at Scale

Works like “100 extra eyes” on every claim
