

Crayon Disaster Recovery As A Service (DRAAS) is a solution where an updated and automated replication of your virtual machines is being done to keep your applications active during planned and unplanned outages.

FEATURES:

- End-to-end DR solution that is simple, secure, scalable, and cost-effective.
- Can be integrated with on-premises data protection solutions as well.
- Prevents accidental deletion or corruption of data, by recovering your business services in a timely and orchestrated manner during service disruptions.
- DR solution on cloud is simple to architect, cloud-native, highly available and resilient.
- Replication of any workload running on supported Azure VMs, on-premises Hyper-V and VMware VMs, and Windows/Linux physical servers.
- Replication using recovery points with application-consistent snapshots.
- Support for planned failovers for expected outages with zero-data loss or, unplanned failovers with minimal data loss.

DELIVERABLES:

- Understanding of services.
- Summarized presentation.
- Demonstration of services with its unique features.
- Questions & Answers regarding demo.
