Crayon

Azure Governance Implementation

Crayon Azure Governance service brings best practices and policies about enforcing any of your Azure services.

Products

1. Review existing resources in your Microsoft Azure subscriptions
2. Identity internal policies for your environment in the area of Cost Management, Security, Resource, Identity and Deployment
3. Deliver the recommendation list of changes in your Azure environment
4. Implement changes to Azure subscriptions (improve overall Azure services operations efficiency)
5. Review changes, monitor spend and encourage accountability across your entire organization

Five disciplines for governance:

- Cost Management
- Security Baseline
- Resource Consistency
- Identity Baseline
- Deployment Acceleration
