

Power Platform 1 Month Implementation

Drive your business automation with **Power Platform** technologies that help organize all business processes around the **Microsoft 365 and Teams ecosystem**, streamline employee work and provide mobility when working with business processes.

With Crayon's implementation **Power Platform** solutions you can:

1

Develop a ready-to-use business application aimed at increasing employee productivity or automating the work of frontline workers

2

Evaluate the flexibility and functionality of Power Platform products: Power Apps, Power Automate, Power Virtual Agent

Within one month, together with **Crayon experts** we will go through all the stages of business applications development on the **Power Platform**:

Discovery

to identify business needs and pains, as well as define the main scenario for automation abilities

Envisioning

for business process description, requirements gathering and solution architecture development

Implementation

where solution development with regular demonstrations and discussions with stakeholders will take place

Deployment

deploying the application and providing access to it to the workgroup of employees

As a result, you will get a ready-made solution, along with an understanding of the architecture and implementation steps using **Power Platform capabilities**.
