

●● Road to Cloud Implementation

Crayon Road to Cloud Implementation migrates up to five selected workloads to the cloud.

Crayon Road to Cloud Implementation enables organizations to migrate to Microsoft Azure one workload at a time.

Road to Cloud Implementation moves up to five selected workloads.

Stage 1: Optimization Provide Optimization services to maximize costs and deliver predictability for the budgeting process.

Stage 2: Innovation

- Identify innovative technologies to drive additional business and technology value.
- Deliver value by educating and implementing Microsoft technologies like services-based architecture, serverless computing, platform as a service, and Machine Learning.
