

Road to Cloud Proof of Concept

Crayon Road to Cloud Proof of Concept tests five workloads of choice in the cloud to ensure viability.

Crayon understands that sometimes a holistic move to the cloud is not the best option for a company.

Crayon Road to Cloud Proof of

Concept offers clients the option to choose 5 workloads to assess and move to Microsoft Azure.

Stage 1: Select up to 5 workloads to be migrated to Azure in a Proof of Concept and ensure viability in the cloud.

Strategy and Execution

- The ability to align technology to business goals and deliver the optimal configuration.
- The ability to run and monitor systems to deliver business value and to continually improve supporting processes and procedures.

Data Protection and Governance

 The ability to protect the information, systems, and assets while delivering business value through technical configuration, process, reporting, and mitigation strategies. **Stage 2:** Continue Proof of Concept and ensure viability in the cloud against:

Reliability and Agility

 The ability of a system to recover from infrastructure or service disruptions, dynamically acquire computing resources to meet demand, and mitigate disruptions such as misconfigurations or transient network issues.

Performance and Scalability

- The ability to deploy and deliver computing resources efficiently to meet system requirements.
- Maintain efficiency across all systems as demand changes and technologies evolve.

Financial Optimization

 The ability to run systems to deliver business value at the lowest price point while forecasting monthly consumption, and quickly identifying and understanding deviations.
