

# Copilot Technical Assessment

Launch Copilot confidently: Crayon's Microsoft Copilot Technical Assessment ensures data protection and optimizes your Microsoft 365 environment for maximum AI productivity.

## Impact to your business

### Secure and compliant

AI-powered Microsoft 365 environment

### Streamlined integration

with minimal risks and optimized performance

### Enhanced productivity

with well-governed Microsoft 365 workspaces

### Confidently navigate AI adoption

with expertly crafted readiness strategies

## NAVIGATING AI INTEGRATION COMPLEXITIES

In today's digital workspace, effectively integrating AI tools like Microsoft 365 Copilot is challenging. Businesses often struggle with ensuring data security, compliance, and optimal usage across their Microsoft 365 environment.

Crayon's Technical Readiness Assessment addresses these complexities, offering a clear path to safely harness the power of AI, enhancing collaboration and productivity.

## COMMON CHALLENGES

- Vulnerability to Data Leaks and Exposure
- Navigating Compliance Complexities
- Addressing Productivity Bottlenecks
- Maximizing Copilot's Untapped Potential
- Proactive Management of Security Risks

## The value we provide

Specialized expertise in Microsoft 365 and Azure environments

Inclusive security approach: endpoint, email, and Azure resource checks

Tailored solutions and customized action plans based on client needs and security findings

Emphasis on compliance with regulatory standards, including Center for Internet Security Controls (CISv8)

Continuous global support from certified security experts, 24/7

Unbiased, client-focused recommendations in a vendor-agnostic approach

# Copilot Technical Assessment

## COPILOT TECHNICAL ASSESSMENT OVERVIEW

Embrace the potential of Copilot for Microsoft 365 confidently with Crayon's Technical Readiness Assessment. Our comprehensive workshop evaluates your current Microsoft 365 setup, focusing on Teams, Groups, Exchange, SharePoint, and OneDrive.

We identify key security, governance, and compliance risks, delivering a detailed risk report for your environment. This assessment ensures that your Copilot implementation is both secure and efficient.

With our expert guidance, you'll receive a prioritized action plan to remediate risks, ensuring you are ready to begin your AI-journey with unwavering confidence.

## OUR METHODOLOGY

Crayon's Technical Readiness Assessment provides a thorough review of current data governance pinpointing areas for fortification against unwanted data exposure and unauthorized access.

- 1. Comprehensive Data Collection:** Extensively gather data across Microsoft 365 Teams, Groups, Exchange Online, SharePoint Online, and OneDrive for Business.
- 2. Analyze:** Provide a detailed risk report identifying data exposure, external sharing, sensitive information types, and governance issues.
- 3. Review:** Discuss the report's findings, offer recommendations, and define a prioritized action plan for remediation and best practice implementation

## ABOUT CRAYON

Crayon is a full-service IT optimization and transformation consulting company supporting our customers through scalable advisory services and solutions that support their long-term cloud business transformation.

Our global team of experts work with your business to help "optimize to innovate" across licensing, cloud optimization, modern work, data, and AI readiness. Wherever you are in your digital transformation journey, we sit on your side of the table to ensure you get the most from your IT investments.
