

Navigating a cloud migration is complex. As a Microsoft Azure Expert MSP, we'll make sure you avoid the common roadblocks that cause cloud adoption initiatives to stall or fail before they even start. The migration services workshop provides:

- Proven, real-world proficiency and skill, for data center lift-and-shift, born-in-cloud new applications, and everything in between
- Full stack approach Expertise in every facet of cloud transformation
- Best of the best Accreditation via rigorous recurring third-party audit program

Knowing where to start the journey of migrating from on-prem to public cloud can be overwhelming. This workshop guides you through a proven framework that will give you key insights and prepare you to make the best decisions.

Workshop Agenda

This workshop has three phases:

1. Evaluate

2. Explore

3. Plan

During this one-day workshop we will assess the true potential cost and utilization information will be mapped to a right-sized environment. Our team of solutions specialists, architects, and data scientists will work with you to identify substantial saving opportunities while taking full advantage of the public cloud.

Deliverables

At the end of every workshop, you will have:

- Review of the total cost of ownership (TCO)
- Review an ROI Report Financial analysis of moving workloads to Azure
- Assess current strengths and identify areas to that need focus
- A focused proposal and roadmap for moving your workloads to Azure

Your Journey

Workshop

Assessment

PoC

Implementation

Workshop Objectives

- **Evaluate Goals and Desired End State:**
Review customer goals for migrating platform and workloads.
- **Explore the Cloud Adoption Framework** including methodologies for:
 - Assessing the maturity of the apps and workloads
 - Planning the workload and application roadmap
 - Establishing PoC landing zones and migrating remaining workloads
 - Operating and optimizing the cloud
- **Plan the Business Case Development and Roadmap:**
Review financial models, return on investment, and identify business, operational, and technical gaps.
