

In 2014, we established our AI/ML practice at Crayon, offering a comprehensive approach that encompasses all aspects of AI adoption and transformation. Our team of solutions specialists, AI Advisors, architects, and data scientists are available to help you unlock the full potential of your data for business purposes. As experts in AI, we can collaborate to analyze use case scenarios and identify the challenges your organization faces.

In addition, Crayon's Global AI Center of Excellence (CoE) with three locations is available to support and guide organizations in implementing responsible AI practices. At Crayon, we prioritize responsible development of AI through our reference framework, CRAIG (Crayon Responsible AI Guidelines). Our commitment to sustainability, ethics, trust, robust engineering, and security is reflected in our services. This includes developing a comprehensive policy, integrating responsible AI practices into sales and delivery processes, implementing support and governance structures, and disseminating knowledge.

Take the first step towards unlocking the future of AI by allowing Crayon's team of experts to guide you through the exciting new world of Azure OpenAI. With our guidance, you'll learn how to synthesize your business needs with this new technology and build a strategic roadmap for your enterprise's AI deployment.

Workshop Agenda

During the workshop, Crayon analytics experts will uncover and understand your goals & challenges through business and technical discussion.

Review the Azure OpenAI Service product platform and capabilities

Envision solutions and understand best practice AI deployment options

Create a strategic roadmap for implementation of proposed solutions

Duration:

- 2 hours

Cost:

- Free

Deliverables:

At the end of every workshop, you will have:

- A fundamental understanding of Azure OpenAI product platform and capabilities
- A Roadmap for implementation of proposed solutions

Your
Journey

Workshop

Deep Dive and Design

PoC/MVP

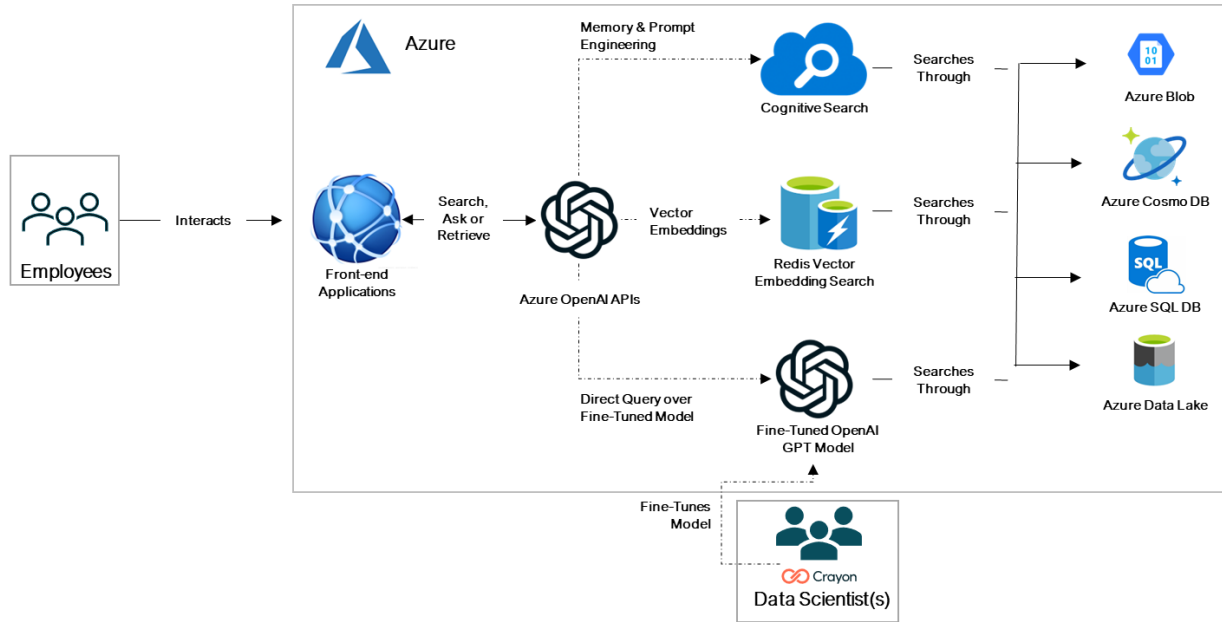

Implementation

Areas of Expertise

-  Extensive language technologies experience matured in 9 years of Applied AI projects with over 200 reference cases
-  Microsoft AI Strategic Partner: Closely collaborating with Microsoft AI Product Groups since 2016
-  Azure OpenAI and Transformers (GPT-like models) have been successfully applied in +15 projects
-  Crayon is your trusted advisor to lead your organization in the OpenAI journey
