∞ Crayon

We established our Data & AI practice in 2014. As an Azure Expert Microsoft Service Provider (MSP) we use a full stack approach, with expertise in every facet of cloud transformation. Work with our team of solutions specialists, architects and data scientists to understand and unlock the business value of data.

Collaborate with Crayon data scientists that specialize in Data & AI solutions. Together we will analyze use case scenarios to identify challenges your business faces, and how a data platform integration can address them. Within seven business days you will have recommendations and an action plan with next steps for implementation.

Deploying Power BI in a large enterprise is a complex task that requires a lot of thought and planning. Getting proper guidance and best practices can help you understand the choices you will make, gather requirements, and learn best practices that can make your Power BI enterprise deployment a success.

Workshop Agenda

During the workshop, Crayon analytics experts will uncover and understand your goals & challenges through business and technical discussion

- Review Power BI product platform and capabilities

- Review licensing and deployment options Explore

- Create a roadmap for implementation of proposed solutions

Cost
- Free

Duration
- 2 hours

Deliverables:

At the end of every workshop, you will have:

- A Roadmap for implementation of proposed solutions
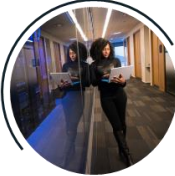

Your Journey

Workshop ▶ Assessment ▶ PoC ▶ Implementation

Power BI

- The Power BI cloud service is extremely rich in its capabilities, including an increased set of augmented analytics and automated ML capabilities.

- AI-powered services, such as text, sentiment, and image analytics are available within Power BI Premium and draw on Azure capabilities.

- The increasing integration of Power BI into Microsoft Teams, with its tens of millions of daily active users, will inevitably further increase Power BI's reach in the world of remote working.

Power BI Product Portfolio

Author	Share and collaborate	Large scale deployments
Power BI Desktop	**Power BI service**	**Power BI Premium**
Free data analysis and report authoring tool	Cloud-based modern business analytics solution	Dedicated capacity for increased performance

Share and collaborate	App dev
Power BI Report Server	**Power BI Embedded**
On-premises report server	Visual analytics embedded in your applications

We help clients optimize and innovate with software, cloud, data and AI. Our team has deep expertise, with over 100 data scientists, each averaging 10 years of experience. Our services can help with a cloud migration, innovate through Azure, and improve the user experience with Modern Work and Teams solutions, all while keeping your data secure.
