

CLLOUDCOCKPIT

Simplified Cloud Management

Welcome to CloudCockpit, where simplicity meets innovation.

Our mission is to **simplify** Microsoft license management. We achieve this by **automating** the full provisioning lifecycle, reducing complexity, and **manual effort**.

This is CloudCockpit

Microsoft Direct and Indirect Partners worldwide trust CloudCockpit to streamline cloud operations, automate invoicing, and simplify reporting.

We've expanded our reach, empowering businesses across more than 39 countries. By helping organizations save time, minimize errors, and unlock actionable insights, we deliver measurable impact that drives growth.

Why CloudCockpit?

Simple. Your goals are our goals. CloudCockpit is built to deliver results, not just updates.

From seamless onboarding to strategic reviews and ongoing support, our expert team ensures your organization maximizes the value of CloudCockpit at every step.

Continuously evolving to enhance performance and deliver deeper insights, CloudCockpit simplifies the complexities of Microsoft Cloud AI Partner Program rules.

Whether it's managing business risks, automating pricing updates, or monitoring subscription health, we streamline intricate processes—freeing you to focus on growing your business and achieving your goals with confidence.

Let us guide you through some of the features

At CloudCockpit, we take pride in offering a diverse range of powerful functionalities. We continuously innovate to meet the ever-changing needs of our users. Our platform aligns with the core needs of CSP businesses, providing a comprehensive solution for managing your Microsoft partnerships. But we don't stop there. By listening to our community, we engineer solutions that enable your success.

Let's take a closer look at some of the highlights that make CloudCockpit an exceptional choice for your business:

Risk Management

Spots risks before they become problems. Your hub for spotting, managing, and mitigating risks in real time.

Subscription management

Say goodbye to juggling systems. Easily handle provisioning, billing, upgrades, and cancellations from one platform.

Reconciliation information

Imagine an accounting process where invoices match effortlessly—no more manual checks, no more errors.

Multi-tenancy

Managing multiple tenants CSP doesn't have to be complex. With a single platform, you simplify processes.

Financial reporting

Unlock the story behind your data. Your data holds the answers. Spot trends, gain clarity, and make decisions that matter.

Track license & Expiring subscriptions

No more guess work. Track usage, spot underutilization, and save costs with smarter allocation

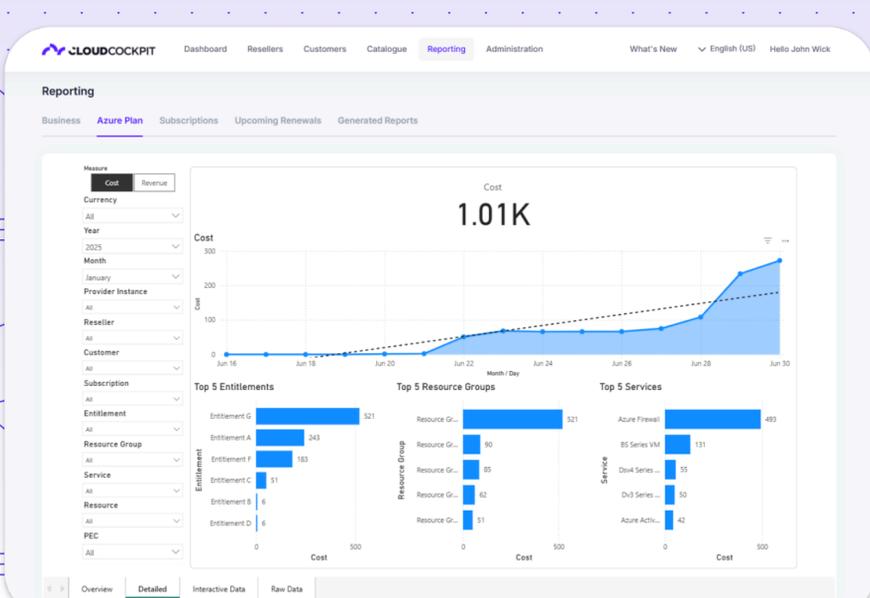

Full API access

Full control with API access. Connect your tools, streamline your processes, and create workflows that drive results.

And much more

Empower resellers and customers with seamless access to risk management, APIs, reporting, and more.
