1 Day Business Process Automation Assessment

Solution overview

Let Creospark help you modernize your organization with our One-Day Business Process Automation Assessment Workshop to move one of your old business processes, workflows, forms, or reports to the Microsoft 365 Power Platform – using Power Apps, Power Automate Flows, Power BI, Dataverse, AI Builder, Microsoft Teams, and Power Virtual Agents. At the end of this One-Day Assessment Workshop, we shall provide a high-level architecture and migration recommendation, an estimated Level of Effort (LOE) required, and related timeline for performing the Implementation.

Opportunity

Increased development agility by automating and simplifying repetitive and time-consuming processes to launch faster and reduce errors across your organization. Reduce time & cost building web and mobile applications, enabling you to get through your development backlog.

Leverage the and understand the Microsoft Power Platform technology and licensing you are already paying for.

Clients

Cross-industry

Startup, SMB, Enterprise
