Successfully Rollout Microsoft 365 Copilot with Creospark

Implementing AI in any organization requires careful planning of content, infrastructure, and training. **Preparation is not optional; it's necessary.** Let Creospark help you build the foundations for successful Copilot adoption, so you can make the most of your AI investment.

Unlock the Full Potential of Microsoft 365 Copilot with Creospark

Creospark's team of experts will help you overcome frequent hurdles of AI implementation:
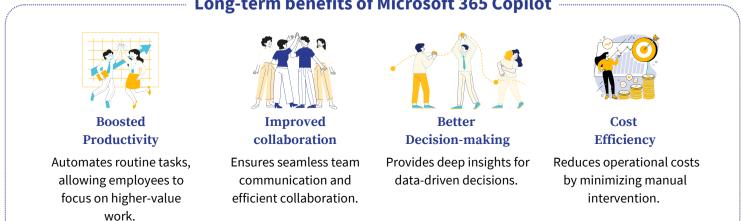

PARTNERING WITH CREOSPARK

- Master AI adoption with tailored readiness strategies
- Boost productivity with well-managed Microsoft 365 workspaces
- Ensure a secure and compliant AI-driven Microsoft 365 environment
- Achieve seamless integration with minimal risks and optimal performance

DEPLOYING AI ON YOUR OWN

- Difficulty unlocking Copilot's full potential
- Resolving productivity bottlenecks
- Susceptibility to data breaches and exposure
- Managing compliance challenges

Microsoft 365 Copilot Elevates Productivity

Modern work demands intelligent, secure, and scalable technologies. AI provides a competitive edge to your operations, enabling your organization to increase innovation and productivity.

Long-term benefits of Microsoft 365 Copilot

Boosted Productivity

Automates routine tasks, allowing employees to focus on higher-value work.

Improved collaboration

Ensures seamless team communication and efficient collaboration.

Better Decision-making

Provides deep insights for data-driven decisions.

Cost Efficiency

Reduces operational costs by minimizing manual intervention.

Comprehensive Solutions Tailored to Your Needs

This engagement assesses your content sources and provides tailored recommendations for Microsoft 365 Copilot readiness, rollout, and adoption. We offer comprehensive support through practical use cases and training, ensuring your organization is strategically positioned to deploy Microsoft 365 Copilot with a clear roadmap for success.

1. **Content discovery:** Content is audited to ensure an optimal information architecture is ready for Microsoft 365 Copilot utilization.
2. **Security and privacy discovery**: Permission settings and security groups will be analyzed to ensure proper data access through Microsoft 365 Copilot.
3. **Technical enhancement discovery:** Receive recommendations for network or application optimizations.
4. **Customized use cases:** Receive documentation of Microsoft 365 Copilot use cases for different business functions.
5. **Change management:** A Viva Engage Community or SharePoint Center-of-Excellence site to facilitate adoption.
6. **Test case deployment:** Test cases will be deployed to ensure that content that should be secured remains non-accessible to the Microsoft 365 Copilot system.

About Creospark

Creospark is an IT consulting company focused on helping businesses understand, adopt and love their technology. We specialize in building digital solutions powered by Microsoft 365, Copilot, Viva, the Power Platform, Dynamics 365, SharePoint, Teams, and Azure. Our solutions inspire teamwork, promote data-driven problem-solving, streamline business processes, and empower teams to accomplish more.

Why choose Creospark?

60+
Years of Microsoft Experience

3
Microsoft MVPs

40
Microsoft exams & certifications

We can make technology work for you, not the other way around.

Our Methodology

Creospark has a standard project methodology broken down into 5 stages. Here is what to expect:

Envision

Define your organization's unique needs through content, security & privacy and technical discovery workshops.

Define

Recommendations for content and security configurations and documentation of use cases will be defined.

Blueprint

The security model, information architecture and metadata management will be designed in more detail.

Build

A SharePoint site for the Microsoft 365 Copilot Center of Excellence will be built. Test cases will be deployed so users can test the system.

Maintain & Engage

End-user training will be delivered and the transfer of technical knowledge will be facilitated.
