

User Profile Manager

This innovative application harnesses the capabilities of Microsoft 365 and Microsoft Entra ID (Azure Active Directory) user profiles, Power Automate, and Power Apps technologies to empower non-technical users to effortlessly update their account information in Active Directory stored within Microsoft 365. Whether it is the users' first names, last names, departments, roles, or managers, the power of control is now in the hands of your team.

With "User Profile Manager," non-IT individuals can assign team members to distinct groups within Active Directory, streamlining administrative tasks. This solution offers users a window into their access privileges, allowing them to effortlessly navigate their information and files.

Technologies used:

Dataverse

Power Apps

SharePoint

We're here to help your organization understand, adopt, and love its technology
