

Work how you want.

Viva Connections: Dashboard Adaptive Card Development Offer

Drive Employee Engagement and Workplace Productivity

Drive employee engagement and workplace productivity

Discover how your organization can use Microsoft Viva Connections' Dashboard & Adaptive Cards features. Connections helps you amplify culture and communications within your organization. We will help you leverage Microsoft Viva Connections as your gateway to a modern engagement experience, designed to keep everyone engaged and informed.

Who is Creospark?

At Creospark, we empower businesses to work the way they want to. Whether that is in a physical office, or together in the cloud, we think the only thing harder than transformation is failing to transform. We, now more than ever, face the need for better collaboration, better employee engagement and more human communications. It's not about the technologies anymore, it's about creating a digital hybrid office where you can work anywhere, safely in the cloud. Business transformation starts with your people, your organization, and your processes, in that order. We want to empower businesses to increase their employee experience while going digital at their own pace. We're here to help you understand, adopt and love your technology.

Why choose Creospark?

With an extensive Microsoft Teams and SharePoint Online modern development expertise, Creospark can help you select a use case and work the way you want to. We can help your vision come to life, where people, data, and applications come together in a single customized dashboard through Viva Connections.

Creospark will help you build an interactive dashboard card in Viva Connections that will help people in your organization be more productive and more engaged with your organization, all within the Microsoft Teams browser, client or mobile app.

Our team will work with you to understand your priorities, challenges, and culture to better design a Viva Connections Dashboard card solution that will meet your specific needs.

Get started with Viva Connections

01

Evolve your intranet portal into an audience targeted central hub with Dashboard Cards easily accessible on any device using Microsoft Teams

02

Provide an easily accessible and user-friendly interactive Dashboard Adaptive Card to improve your workforce's productivity

03

Build meaningful connections to your workforce and engage your employees to bring their daily tasks in the hub for Teamwork – Microsoft Teams

How Creospark will help you

This offer will help your organization build one fully functioning Dashboard / Adaptive (ACE) Card that fully functions in the Viva Connections Microsoft Teams mobile, desktop or browser apps that fulfills a use case for a specific audience in your organization

Estimated
Cost:
\$20,000 USD

1

Week 1

Prepare your Microsoft 365 tenant and existing SharePoint Online based Intranet for Viva Connections

2

Week 2

Unearth your Dashboard Card use case and audience while preparing your LOB web services

3

Week 3 & 4

Enable Connections-driven collaboration across your organization

1

Enable Viva Connections in your Microsoft 365 tenant configuration

2

Configure your Microsoft Teams App Setup and Permission Policies and target to the right audiences

3

Prepare the necessary Azure Active Directory user and group permissions for your Viva Connections required capabilities
Validate and setup the infrastructure requirements for hosting the API needed for target LOB systems to integrate

4

1

Identify immediate opportunities for audiences in your organization to be more productive and engaged and evaluate based on Impact vs Ease of Implementation
Leverage the power of Adaptive Card Extensions (ACE) to enable critical LOB Apps, processes and information for Connections-driven employee experiences.

2

3

Plan for a pilot of Viva Connections with a group of business users

4

Work with LOB app developers to provide the appropriate API end points and provide the data with the correct format needed for your dashboard card

1

Let Creospark work with your team to design out your Dashboard Card user experience initially conceived from <https://adaptivecards.io>

2

Have your development team, work with ours, to implement and test out the new Dashboard Card with the appropriate API in a development environment

3

Deploy the Viva Connections Dashboard Card solution in your production environment to the selected pilot audience

4

Start planning the adoption, change management and training initiative to help your organization realize the value of your investment in Viva Connections
