

Your First Copilot Proof of Concept

Unlock the Future of Productivity with Our First Copilot POC

Designed to explore the potential of AI assistance, this offering provides comprehensive support for developing a non-production Copilot tailored to your needs. Experience firsthand how an AI Copilot can revolutionize your workflows and empower your team to achieve greater success.

Through hands-on experience with a customized AI Copilot, you'll gain insights into its capabilities and benefits. Our team will work closely with you to identify key challenges and opportunities, ensuring the solution aligns perfectly with your organizational goals.

By participating in this program, you'll not only explore the transformative power of AI but also lay the groundwork for implementing effective solutions that drive efficiency and innovation across your business. Experience firsthand how an AI Copilot can revolutionize your workflows and empower your team to achieve greater success.

What's included:

Development of non-production Copilot: Get hands-on experience with a non-production version of Copilot, allowing your team to explore its capabilities and benefits in a safe environment.

Discovery workshops: Participate in expert-guided workshops that identify your specific needs, challenges, and goals, ensuring a tailored approach.

Ideation sessions: Collaborate with our team in ideation sessions to brainstorm innovative use cases and applications for Copilot in your organization, maximizing its potential impact.

Best practices: Learn from industry best practices to ensure you leverage Copilot effectively. Our consultants will provide insights to optimize usage and integration within your workflows.

Unlimited custom topics: Within a defined 24-hour budget, explore unlimited custom topics that fit your organization's unique needs, enabling a personalized experience with Copilot.

Project Roadmap: Receive a clear project roadmap outlining the steps for successful implementation, ensuring you stay on track and achieve your objectives.

Professional Consultation: Benefit from expert consultation throughout the process. Our team will provide ongoing support and guidance to help you maximize the value of your Copilot POC.

Project Management: A dedicated Project Manager and Project Coordinator will be on your project to ensure transparent tracking, effective communication, and optimization of team performance.

Why Choose Our First Copilot POC?
