ASSESSMENT: **PARAGON® FRAMEWORK ASSESSMENT**

The Paragon® Framework Assessment drives awareness of best practice for Microsoft solutions, the roles required to support business change, and the key processes for Dynamics 365 and Power Platform success.

Crimson's Paragon® Framework Assessment is a set of workshops designed to highlight the stand-out elements of the Paragon® framework. Assessing the current business change readiness, organisations are led through best practice of the Power Platform or Dynamics 365 programme. Interactive exercises highlight specific processes that need improvement for a successful implementation.

Consisting of four sessions, the Paragon Framework Assessment spans five days, including an assessment of the organisation's maturity to implement the required framework.

Session A. – What is the Framework and what are the benefits?
Delve into the key components of the Framework that are required for successful implementation.

Session B. – The Framework processes
Understand the processes required to solve the organisation's unique problems with an interactive assessment.

Session C. – Technology
Take a look at best practice for solution and Evergreen management and review whether the organisation is ready for implementation with an interactive maturity assessment.

Session D. – People
Consider the personas and roles the organisation currently has and what is required across product, solution, and change management, including another interactive assessment exercise.

Who should attend?
C-Suite / Business Leads – a maximum of 15 people should attend the workshops

What is included?
Four workshops and an assessment report detailing recommendations and actions.

Time included
Seven days, to include four workshops and an assessment report.

Investment
£POA

Guide your team towards successful continuous improvement.
