# IMPLEMENTATION: **CENTRE OF EXCELLENCE QUICK START**

The implementation and selection of Microsoft's Centre of Excellence Starter Kit features to facilitate and automate an organisation's governance policies.

Crimson engages with an organisation's IT team to provide a new Dataverse environment and install the standard Microsoft Centre of Excellence toolkit, configuring the OOTB connectors to enable the organisation to quickly utilise the standard offering for the team to adopt. Including a set of workshops to agree the customisations needed to tailor the toolkit to the agreed IT processes and governance.

Supporting the organisation across the implementation journey, from executing the implementation plan, to keeping them on track with assessments, reviews, and advice.

Following the workshops, organisations will receive an engagement summary report, detailed implementation plan for Centre of Excellence and a Power Platform roadmap.

Who should attend?
C-Suite / IT Team

What is included?
Workshops, training, and an engagement summary report

Time included
Three days, to include workshops, training, and an assessment report.

Investment
£POA

Guide your team towards successful continuous improvement.
