ASSESSMENT: **PARAGON® PEOPLE ASSESSMENT**

Working with an organisation's IT team to assess the roles and personas required to adopt selected parts of the Paragon framework.

A set of workshops to highlight specific roles and personas needed for a successful adoption of the Power Platform. The assessment includes an interactive assessment analysing the current and required roles within the IT team. Recommendations on training and upskilling, plus IT adoption, will also be detailed in a report.

Crimson work with organisations to drive awareness of the framework components, and then assess their maturity to implement the required framework. This assessment covers the following theme and activities:

People
Consider the personas and roles the organisation currently has and what is required across product, solution, and change management, including another interactive assessment exercise.

Following the workshops, organisations will receive an assessment report, which outlines what has been captured during the assessment exercises and includes recommendations and actions.

Who should attend?
Biz Leaders & CIO / CTO / COO – a maximum of 15 people should attend the workshops

What is included?
Workshops and an assessment report detailing recommendations and actions.

Time included
Two days, to include workshops and an assessment report.

Investment
£POA

Guide your team towards successful continuous improvement.
