

# 1-Day Workshop | Copilot Studio

At CRMK, we are driven to challenge our clients thinking and working methods while also inspiring how you can take your business to the next level! Therefore, we offer a framework to kickstart your AI journey, where you will also receive inspiration and guidance tailored to your specific needs.

We start with a workshop where we collaboratively build AI-driven bots with Copilot Studio to streamline your operations and create added value.

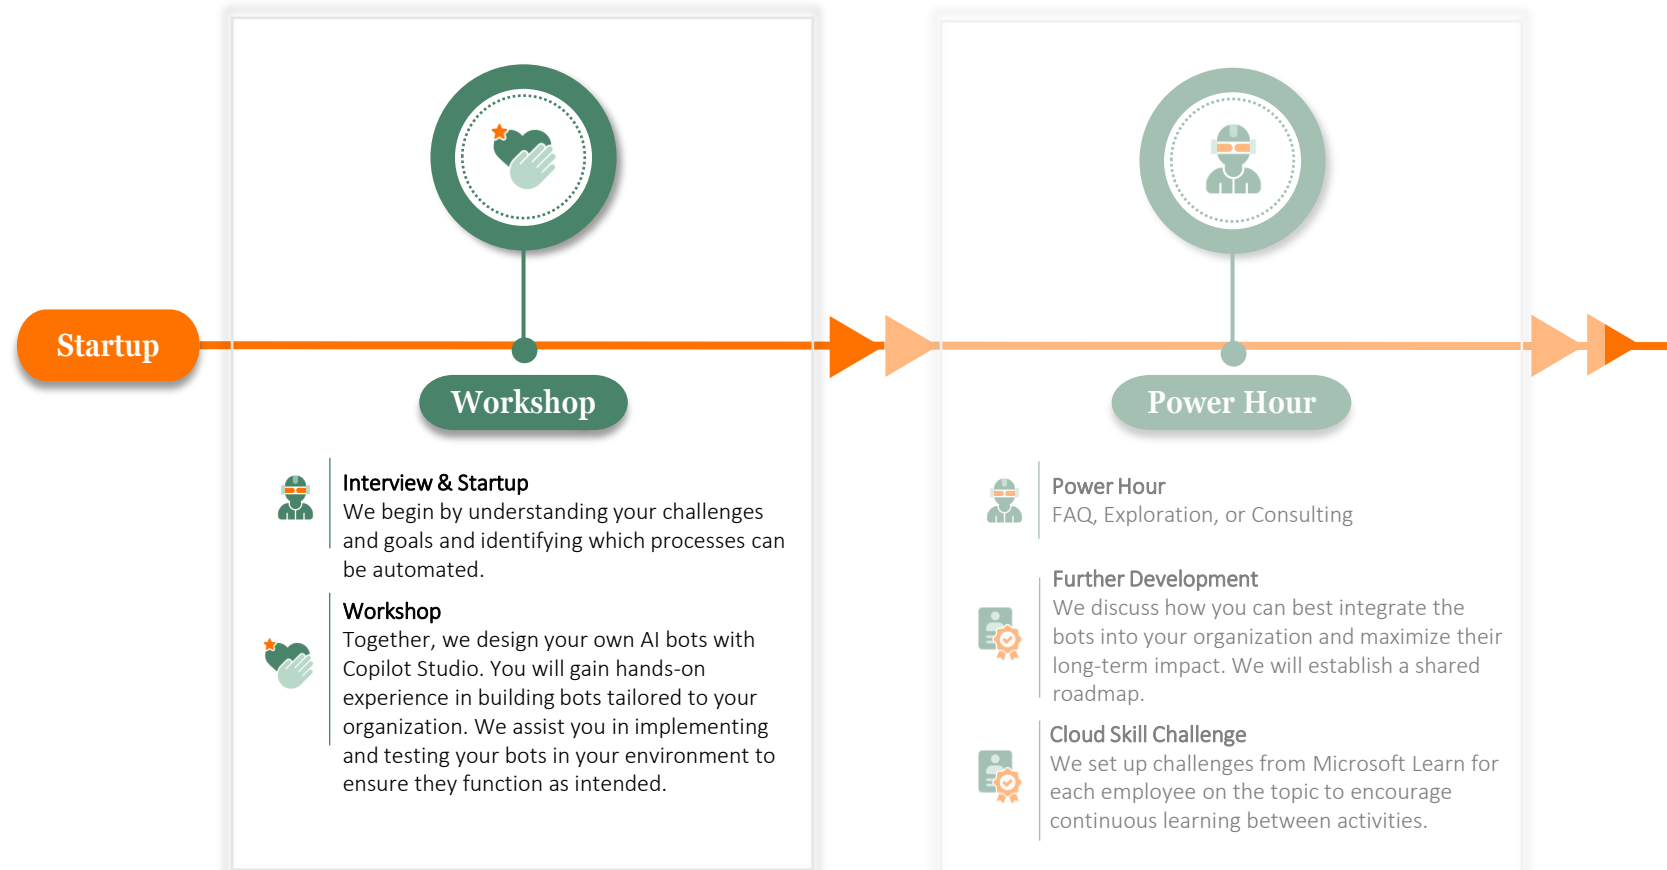

We then combine the results with consulting, training, and Power Hour – everything to empower your employees in their daily work!

Benefits of the workshop;

- Quickly get started with AI-technology and achieve tangible results in a short time.
- Solutions tailored specifically to your needs and business goals.
- Build internal expertise and learn how to further develop your AI bots.
- We ensure that you get the maximum benefit from Copilot Studio in your organization.

Startup

Workshop

Power Hour

#### Interview & Startup

We begin by understanding your challenges and goals and identifying which processes can be automated.

#### Workshop

Together, we design your own AI bots with Copilot Studio. You will gain hands-on experience in building bots tailored to your organization. We assist you in implementing and testing your bots in your environment to ensure they function as intended.

#### Power Hour

FAQ, Exploration, or Consulting

#### Further Development

We discuss how you can best integrate the bots into your organization and maximize their long-term impact. We will establish a shared roadmap.

#### Cloud Skill Challenge

We set up challenges from Microsoft Learn for each employee on the topic to encourage continuous learning between activities.

Any licensing costs are not included.

Charged according to agreement.
