

Power Up with CRMK

LEARN HOW TO EMPOWER YOUR BUSINESS WITH POWER APPS!

Learn how to empower your business with Power Apps

Empower your business with our CRMK version of the globally recognized App in a Day concept.

Our offer includes training for both your IT department and your future Citizen Developers (people from your own business).

Learn about the possibilities with Power Platform, e.g. how to build low-code apps using Power Apps, set up automation with Power Automate and build data models and store data with Microsoft Dataverse.

Power Up with CRMK

Training

One day training
in Power Platform

*Focusing on Power Apps, Power
Automate and Microsoft Dataverse*

Requirements Gathering

One day workshop

*We'll help you gather requirements
and start building your app*

Power Up with CRMK

1 app ready to use

One app including licenses
(10 licenses for 6 months)

Training

During the training session you will be inspired to create apps that fit your business.

You will learn the concepts of building different kinds of apps as well as set up automation.

Requirements Gathering

During the workshop session we will help you gather requirements for building your own first app and after that we will start building the app together with you.

Depending on the size of the app, additional time may be needed in order to finish the app.

Power Up with CRMK

After these sessions you will not only have your own production-ready app, you will also have the skills to start building your own future apps.

Licenses are included within this offer, 10 licenses for 6 months. If you already have licenses, please contact us and we can discuss a setup without the licensing part.
