Project Service Offerings: We Serve Our Clients with a Straightforward, 3-Step Approach to Adopting AI

DISCOVER The Value

Introductory Points on your AI Journey

AI Workshop Train your team to be more familiar with emerging AI technologies

Proof of Concept (POC) Deliver a working AI solution tailored to your needs, showing measurable value within weeks

AI Roadmap Develop a prioritized AI timing & investment plan based on value impact

1-4 Weeks

IMPLEMENT Solutions

Deliver Significant Business Value

Crowe Agent Accelerators Rapidly configure prebuilt AI agents in your ecosystem

Production Builds Create scalable, enterprise-grade AI solutions

AI Data Analytics Deploy a centralized, integrated & AI-ready data foundation with the latest infrastructure technologies

4-Weeks per Sprint

MANAGE Rapid Change

Stay Ahead of AI's Advancements

AI Product Support We augment existing teams or set up new ones for ongoing maintenance & updates of your AI solutions

AI Project Oversight Trust our AI experts & project managers to deliver end-to-end projects to production

AI Governance Advisory Navigate the rapidly evolving AI regulatory & ethical landscape

Ongoing Support

We Work With…

- ✓ Your Enterprise Apps
- ✓ Your Processes & Data
- ✓ Your Organizational Culture

We Build…

- ✓ GenAI & Agentic Workflows
- ✓ Advanced Data Analytics
- ✓ Scalable ML Solutions

We Partner With…

OpenAI

Microsoft Partner

Crowe's AI Toolkit is Built Around Microsoft's AI Solution Stack (38 Primary Tools*)

	User Engagement & Productivity (6)	Data Mgmt & Analytics (9)	Operations & Security (8)	AI & Machine Learning (5)	Development Tools & Platforms (10)
Level 1 **End User, Citizen Developer**	Copilot M365 Teams & Teams Premium Edge AI Search	**Fabric:** Basic Analytics Power BI			
Level 2 **Power User, Business Analyst**	Power Automate Power Apps Power Pages	**Fabric:** Adv Analytics	Copilot for Security	Copilot Studio	GitHub Copilot
Level 3 **Expert IT Staff, Data Specialist**		**Fabric:** Data Factory, Data Lake Dev, Data Lakehouse, Data Warehouse, OneLake Blob Storage Purview	GitHub Adv Security Azure AD / Entra	**Azure AI:** Search Index, Language & Translation, Speech, Vision, Content Safety, Doc Intelligence Azure OpenAI Service	Azure AI Foundry GitHub Enterprise C#, .NET CORE Azure Prompt flow
Level 4 **Infra Engineer, Data Scientist**		**Fabric:** Semantic Layer, Data Engineering Azure SQL Azure Cosmos DB	Azure Functions Azure PowerShell Azure Service Bus Azure Web Services Azure Kubernetes	Azure Machine Learning Semantic Kernel	Azure SDK Visual Studio Code LangChain AutoGen Azure Developer CLI

Brief tool descriptions and associated pricing in Appendix A

Level 1 & 2 Toolset Descriptions & Pricing

Category		Tool	Description	Pricing (in Actual $)
Level 1 **End User, Citizen Developer**	**User Engagement & Productivity**	**Copilot M365**	AI-powered assistant for M365, enhancing productivity through document creation, data analysis, and communication	$30/user/mth
		Teams & Teams Premium	Communication and collaboration platform with enhanced features for video meetings, chats, and integrations	$10/user/mth
		ChatGPT Team	Operates under an OpenAI license, allowing for the use of AI models under specific terms for business, and individual applications	$300/user/year or $30/user/month
	Data Mgmt & Analytics	**Fabric:** Basic Analytics	Cloud analytics solution enabling basic data analysis with low-code/no-code features	Variable/Calculated and Metered See "Analytics" in calculator
		Power BI	Data visualization tool for creating interactive reports and dashboards from various data sources	$10/user/mth, $0 if have E3 or E5 (Pro version)
Level 2 **Power User, Business Analyst**	**Power Platform**	**Power Automate**	Workflow automation service that connects apps, allowing users to automate repetitive tasks easily	$150/bot/mth (Process). $5000/tenant/mth (Process Mining). AI Builder: $500/unit/mth
		Power Apps	App development platform enabling users to create custom business apps without extensive coding skills	Premium: $20/user/mth. Premium with min 2000 users: $12/user/mth
		Power Pages	A platform for creating secure, data-driven websites for business workflows using low-code tools	Authenticated visitors: $200/100 visitors/mth. Anonymous: $75/500 vistors/mth
	Data Mgmt & Analytics	**Fabric:** Adv Analytics	Advanced analytics platform with robust data modeling, real-time analysis, and AI integration	Variable/Calculated and Metered
	Operations & Security	**Copilot for Security**	AI-driven security solution providing threat detection, vulnerability management, and rapid incident response	Variable/Calculated and Metered Search for "Copilot for Security" in calculator
	AI & Machine Learning	**Copilot Studio**	Development environment for customizing AI models to suit specific business workflows and data needs	$200/20,000 messages/mth (if not already using Copilot M365)
	Development Tools & Platforms	**GitHub Copilot**	AI code assistant that helps developers write code faster and with fewer errors	Individual: $10/user/mth. Business: $19/user/mth. Enterprise: $39/user/mth

Level 3 Toolset Descriptions & Pricing

Category		Tool	Description	Pricing (in Actual $)
Expert IT Staff, Data Specialist (Level 3)	**Data Mgmt & Analytics**	**Fabric**	A unified data platform for integrating, storing, managing, and analyzing large-scale data with seamless cloud-based capabilities	Variable/Calculated and Metered See "Analytics" in calculator
		Blob Storage	Scalable object storage for unstructured data, supporting various file types and workloads	Variable/Calculated and Metered
		Purview	Data governance platform providing insights, tracking, and compliance across an organization's data assets	Variable/Calculated and Metered Search for "Purview" in calculator for all options
	Operations & Security	**GitHub Adv Security**	Security enhancement features for GitHub repositories, including code scanning, secret detection, and dependability	$49/active committer/mth
		Azure AD / Entra	Identity and access management service, providing secure user authentication and access control across services	$6, $9 or $12/user/mth
	AI & Machine Learning	**Azure AI***	Suite of AI services for NLP, image analysis, and doc intelligence. As an alternative, we may choose to use OpenAI Service	Variable/Calculated and Metered
		Azure OpenAI Service	Cloud-based platform providing access to OpenAI's GPT models for generating text, analyzing data, and more	Variable/Calculated and Metered Varies by Model used
	Development Tools & Platforms	**GitHub Enterprise**	Enterprise-grade version of GitHub, providing advanced security, compliance, and collaboration features	$21/user/mth
		Azure AI Studio	AI development environment for creating and managing AI-driven apps and services	Variable/Calculated and Metered
		C#, .NET CORE	Open-source framework for building modern, scalable applications across different platforms	Free and Open Source
		Azure Prompt flow	A tool designed to enhance the performance and customization of prompts in AI-driven applications	Included with GitHub or Azure AI Studio

Level 4 Toolset Descriptions & Pricing

Category	Tool	Description	Pricing (in Actual $)
Data Mgmt & Analytics	**Fabric:** Semantic Layer, Data Engineering	Platform for building, managing, and scaling big data pipelines with deep integration into cloud-based solutions	Variable/Calculated and Metered See "Analytics" in calculator
	Azure SQL	Managed SQL database service for building cloud-based relational databases with high availability and scalability	Variable/Calculated and Metered See "Databases" in calculator
	Azure Cosmos DB	Globally distributed NoSQL database designed for low latency and massive scalability	Variable/Calculated and Metered See "Databases" in calculator
Operations & Security	**Azure Functions**	Serverless compute service allowing developers to run code without managing servers, scaling automatically	Variable/Calculated and Metered
	Azure PowerShell	Command-line shell and scripting language for managing cloud resources and automating tasks	Free to use
	Azure Service Bus	Cloud messaging service enabling reliable communication between distributed applications and services	Variable/Calculated and Metered
	Azure Web Services	Cloud platform offering scalable services for building, hosting, and managing web apps	Variable/Calculated and Metered
	Azure Kubernetes	Managed Kubernetes service for deploying, scaling, and managing containerized applications in the cloud	Variable/Calculated and Metered See "Compute" in calculator
AI & Machine Learning	**Azure Machine Learning**	Platform for building, training, and deploying machine learning models at scale	Variable/Calculated and Metered See "AI+Machine Learning" in calculator
	Semantic Kernel	AI-based service for understanding and processing natural language in complex workflows and datasets	Open Source
Development Tools & Platforms	**Azure SDK**	Software development kits offering APIs, libraries, and tools for building applications on Azure	Variable/Calculated and Metered See "Developer Tools" in calculator
	Visual Studio Code	Lightweight code editor with support for various programming languages and extensions	Variable/Calculated and Metered See "Developer Tools" in calculator
	LangChain	Framework for developing applications using large language models by connecting them with external data and APIs	$39/user/mth (Plus). Custom quote for Enterprise
	AutoGen	Tool for automating the generation of code, models, and workflows using AI	Open Source
	Azure Developer CLI	Command-line interface for automating Azure cloud development tasks and managing resources	Variable/Calculated and Metered See "Developer Tools" in calculator

Level 4
Infra Engineer, Data Scientist
