Virtual Desktop Explained

The best virtual desktop experience,
delivered on Azure

- + Deliver the only multi-session Windows 10 experience
- + Enable optimizations for Office 365 ProPlus
- + Migrate Windows Server (RDS) desktops and apps
- + Deploy and scale in minutes

High-level architecture

- Utilizes Azure Active Directory identity management service
- Provides virtualization infrastructure as a managed service
- Deploy and manage VMs in Azure subscription
- Manage using existing tools like Configuration Manager or Microsoft Intune
- Simply connect to on-premise resources

Most customers are already eligible for WVD

Client

Customers are eligible to access Windows 10 single and multi session and Windows 7 with Windows Virtual Desktop (WVD) if they have one of the following licenses*:

- Microsoft 365 E3/E5
- Microsoft 365 A3/A5/Student Use Benefits
- Microsoft 365 F1
- Microsoft 365 Business
- Windows 10 Enterprise E3/E5
- Windows 10 Education A3/A5
- Windows 10 VDA per user

*Customers can access Windows Virtual Desktop from their non-Windows Pro endpoints if they have a Microsoft 365 E3/E5/F1, Microsoft 365 A3/A5 or Windows 10 VDA per user license.

Server

Customers are eligible to access Server workloads with Windows Virtual Desktop (WVD) if they have one of the following licenses:

- RDS CAL license with active **Software Assurance (SA)**

Pay only for the virtual machines (VMs), storage, and networking consumed when the users are using the service

Take advantage of options such as [one-year or three-year Azure Reserved Virtual Machine Instances](#), which can save up to 72 percent versus pay-as-you-go pricing. [Now with monthly payment options!](#)

FSLogix Technologies

FSLogix technology, which improves the performance of Office 365 ProPlus in multi-user virtual environments, is now available at no additional cost for Microsoft 365 and Remote Desktop Services customers

Profile Container

Replacement for roaming profiles and folder redirection. Dramatically speeds up logon and application launch times.

Includes Office 365 Container, which roams Office cache data (Outlook OST, OneDrive cache, Skype for Business GAL, etc.) and Windows Search DB with user in virtual desktop environments.

App Masking

Minimize number of gold images by creating a single image with all applications. Excellent app compatibility with no packaging, sequencing, backend infrastructure, or virtualization.

Java Redirection

Helps protect the enterprise from vulnerabilities of multiple installed versions of Java by mapping specific versions to individual apps or websites.

Teams Enhancements

Teams provides end users with better conferencing and media experience

User Experience Benefits

- *Less network bandwidth compared to USB camera redirection*
- *Increased video framerates, up to 30 fps*
- *Enhanced UI for ease of use in virtualized environments*
- *Ability to redirect multiple cameras*
- *High-performance, low latency audio & video calling*
