CSG Pro builds and delivers modern data solutions. *CSG Pro Data Solutions Experts* consist of teams of web developers, business analysts, solution architects, data analytics consultants and project managers, who provide our clients with the "quickest path to value." These experts streamline business processes, improve user experiences, transform data sources into actionable information, all of which contribute to better quality decisions. We integrate cloud and mobile as appropriate to allow for scale, experience and payoff.

Solution Success

CSG Pro recommended an evaluation of Microsoft's Power BI, Azure App Service and SQL Azure platform to provide a cost-effective, scalable and integrated overall replacement platform. A consultative evaluation process resulted in a decision to develop a Proof of Concept (POC) of the Microsoft-based platform. The successful POC created confidence that Power BI, embedded in a custom application, interacting with SQL Azure could replace and improve the solution. A project to make the system production-ready followed.

The production solution is now integrated with a proven external data source and iVET360's customer portal for easy access by customers. Using Microsoft Azure for storage, data migration, analytics and application software provides lower cost and massive scalability when needed. This has created a strategic asset for iVET360. They are positioned to work with industry leaders willing to invest capital in iVET360 and help them expand use of the Dashboard to potentially thousands of hospitals.

What does CSG Pro do?

- In today's world of digital transformation, CSG helps you systematically and cost-effectively become a Data Driven Organization.

- Demonstrate quickest path to value via the CSG Approach - Collect, Organize, Optimize, Analyze, Visualize and Socialize.

- While each client's needs are unique, improving how you relate to your customer and improve your profitability are results we often pursue and deliver.

- This is what we care about, every day. The outcome – delighted clients.

What We Do:

Data Analytics and Data Management Solutions

Web Application Development

Microsoft Cloud Services

Business Analysis & Project Management

Why Choose CSG Pro?

What is CSG Pro good at?

- We are experts at solving problems with the Microsoft Data Platforms – Power BI, Analytics, SQL Server and the Microsoft Application Development and Open Source Development Platforms.

- When it comes to technology, we're good at choosing leading edge technology winners with high value and low cost for our clients. Microsoft Power BI is a prime example. We were early adopters and are endorsed as regional experts by Microsoft as a Certified Power BI Partner.

What separates CSG Pro from our competitors?

- Our experience, expertise and commitment reduces risk and ensure your project succeeds.

- We are quick thinking. We're comfortable working at all levels of an organization, highly productive for you with this competence.

- We're people-oriented, flexible and easy to work with. The importance of our relationships can't be understated. We work hard to earn your trust.

- Your success is our measure of success, so we won't let you fail. We do what it takes to deliver what we promise, every time.
