DELIGHTING CLIENTS SINCE 1993.

About Us

CSG Pro builds and delivers modern data solutions, which many times begins with conceptualizing and systematically collecting data via a modern web application.

CSG Data Solutions Experts consist of teams of web developers, business analysts, solution architects, data analytics consultants and project managers. Experts who streamline business processes, improve user experiences, transform data sources into actionable information, all of which contribute to better quality decisions.

Our expertise centers around designing and building web, mobile and line of business solutions. We place high importance on collaboration between our client and the CSG project team.

Why We Are Different

It begins by listening to you. We apply your unique needs to our proven, 6-Step CSG Approach, which ensures your organization the "quickest path to value". CSG clients realize a strategic and competitive advantage by partnering with us because their complex or unique business requirements can't be solved easily with an out-of-the-box Software as a Service type solution.

The results are compelling — enhanced relationships with internal and external customers, more productive employees, transparency between our teams, predictable costs and schedules. Your success is our measure of success, so we won't let you fail. We do what it takes to deliver what we promise, every time. The outcome – delighted clients.

Service Offerings

Custom Software Solutions – CSG designs and develops modern web and mobile applications using the latest Microsoft and Open Source technologies, with an intuitive design to improve internal and external processes.

Microsoft Cloud Services – CSG creates, migrates and monitors cloud-based web applications and data solutions.

Embedded Analytics – CSG can create and securely embed Power BI solutions into your applications.

Mentoring / Coaching – CSG assists your team with web-based software development using agile methodologies.

Project Management – CSG helps keep your project on schedule and assists your team with requirements and objectives.

Staffing – CSG's focus is project-based engagements; however, we also offer limited engagement staffing.

Application Lifecycle Support and Maintenance Services – CSG's support does not end once your application goes to production.
