Data Analytics

You don't need us to tell you that data is changing the game in business. You don't need us to point out the increasing demands from your leaders to provide dashboards and interactive visualizations accessible anytime, anywhere, using accurate, timely information is hard to do. You know all that.

What you may not know is the "quickest path to value". That's where CSG can help you. We know because we spend all our time thinking about it and delivering it to our clients.

Why Choose CSG Pro?

We are experts at solving problems with the Microsoft Data Platform.

With the Microsoft Data Platform, we take a hybrid approach, cloud and on-premises, to cope with exponential data growth, unlocking true self-service insights from any data, in real time, no matter where they reside.

CSG's Analytics Team is passionate about data. We stay abreast of developments in analytics technology that benefit you with the industry leading, Power BI solution by Microsoft. And we absolutely love the Power BI price tag. You will, too.

We use Agile processes to make your projects predictable, productive and consistently on target with budgets and timelines.

We apply this knowledge for each client, with one goal, to delight you.

We deliver two big things: what you see and what you don't --

- Powerful reports, dashboards and interactive visualization with drill-down capabilities (the tip of the iceberg).
- Everything it takes under the tip of that iceberg – infrastructure, on premises or Microsoft Cloud, Data Modeling, Data Mart / Data Warehouses, Data Extract, Transform and Load, Security and Governance, Mentoring and Training.

In our proven, 6-step Approach, we...

- Collect and Organize data from internal, external, on-premises or cloud-based sources.
- Optimize your data so that business users can trust it.
- Pilot and prove out concepts iteratively so you get value every step of the way.
- Implement Analysis and Visualization tools to the scale required, no more no less, fast and cost effectively.
- We help you Socialize the solution, educating your business and Information Technology people in best practices so they take ownership.
