# Automate Repetitive Process with Just One Click Solution

---

Microsoft Power Platform  
Power Automate Desktop (RPA)

# Executive Summary

Automation has changed the aspects of the business today. In addition, the opportunity of applying robotic automation in business processes has been gaining more attention as they challenge in a digital world, which requires faultless operations.

With RPA Robotic Process Automation solution, businesses are automating knowledge-based, professional service processes that don't demand human interaction. Concurrently, it is serving as a fundamental activist to the conventional insight of labour arbitrage. The RPA services provide data security, enhanced business efficiency and effectiveness across various business applications without modifying available system and infrastructure.

In this solution, we have utilized the Microsoft Power Automate Desktop RPA Tools to automate one of the monthly repetitive task, Employee Medical Claim History Extraction. This solution provides a more efficient way to capture all the employee medical history with just one click and it eventually reduce the human error and also save up the processing time.

# Licensing Requirements
