

NextGen – Window 365 Cloud PC Proof-of-Concept (PoC)

Value Proposition:

Windows 365 is a Microsoft cloud-based service that will help transform your endpoint management service. Together with twoday ctglobal you will be onboarded to a scalable Windows 365 Cloud PC solution based on Zero trust security principles. During this POC our highly skilled endpoint and Microsoft cloud consultants will guide you through the most successful implementation of the service into your platform.

Description of the service:

The Windows 365 Cloud PC POC is intended to be delivered as a 3-day engagement including:

- Assessing the customer's current and future hybrid work end-user computing needs
- Piloting Windows 365 in the customer's production environment and provision Cloud PCs to selected users based on the chosen hybrid work scenarios.
- Developing joint deployment plans and recommended next steps to further grow the solution in the customer environment.

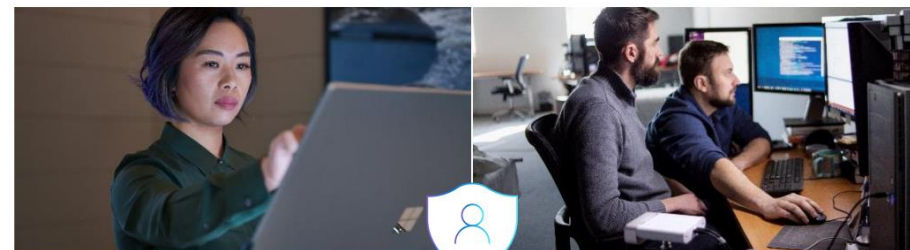

Windows 365 Cloud PC phases:

1.) Plan: Define scope, identify stakeholders, and gather information on current and future environment and workloads. Define business goals and motivations for implementing the Windows 365 Cloud PC service.

2.) Enable: Execute remediation activities to be able to deploy Windows 365 in the customer environment. Setup Windows 365 Cloud PC provisioning and management for a selected group of users focusing on the selected hybrid work user scenarios.

3.) Manage: Learn how to operate the implemented Windows 365 solution and agree on the next steps to further grow the solution within the customer environment.

Windows 365, your Windows in the cloud

Loved by users

Streamed to any devices

Always ready and updated

Personal and familiar

Scalable and resilient

Predictable costs

Simple to buy, deploy, and manage

Trusted by IT

Plan

Define scope
Engage stakeholders
Define business goals and motivations

Enable

Activities to be able to deploy Windows 365 in the customer environment.
Setup provisioning and management for a selected group

Manage

Learn how to operate Windows 365
Agree on the next steps
Grow the solution
