CMMC COMPLIANCE IN MICROSOFT 365

CMMC COMPLIANCE STRATEGY

To help organizations confidently navigate CMMC V2 Level 2 requirements, we offer a structured three-phase engagement that combines strategic planning, technical implementation, and compliance verification.

1 STRATEGIC PLANNING & DOCUMENTATION

We begin with collaborative strategy sessions to define compliance objectives, identify applicable controls, and gather requirements. Our team assists in developing essential documentation, including access control policies, role definitions, and system boundary diagrams—laying the foundation for a successful implementation.

2 TECHNOLOGY IMPLEMENTATION

Our experts configure and verify approximately 320 technical controls across your Microsoft 365 tenant. This includes settings in Entra ID, Microsoft Purview, Intune, Defender, and Azure Policy. We ensure that your environment meets the technical requirements of CMMC Level 2 while maintaining operational efficiency.

3 VERIFICATION & CLOSE-OUT

We conclude with a comprehensive verification process, delivering a detailed report that confirms control implementation and readiness for C3PAO assessment. This phase includes quality control checks and recommendations for ongoing compliance maintenance.

BENEFITS

- **Accelerated Compliance Readiness:** Fast-tracks your readiness for CMMC V2 Level 2 certification.
- **Audit-Ready Documentation & Verification:** Includes documentation and reports to support third-party assessments.
- **Optimized Microsoft 365 Security Configuration:** Implements 300+ controls aligned with NIST 800-171 R2.

$ COSTS

- **Implementation:** $60,000 USD
- **Flat-rate pricing based on a 300-hour engagement, Estimated Duration:** 4 business weeks, *designed for efficient delivery with minimal disruption*, **scope:** fewer than 100 users/devices, *ideal for small to mid-sized environments,* **hourly rate basis:** $200/hour, *transparent rate structure for budgeting clarity.*
- **Client Responsibility:** Provide a test device, *used for configuration and validation activities*.
- **Optional Add-On Services:** *available for extended needs beyond core compliance:*
- Office 365 Migration
- Azure Integration
- Dynamics 365 Configuration
- Data & AI Enablement
- Application Development
