

Copilot Studio in a Day Workshop

Price: \$3,000 | This can be held onsite or via Teams.

This one-day, instructor-led Copilot Studio in a Day (CPSIAD) workshop offers a comprehensive learning path, focusing on hands-on activities using Microsoft Power Platform, specifically Microsoft Copilot Studio and Power Automate.

In this course we will cover:

- **Integration with Latest Technologies:** It incorporates Power Virtual Agents' capabilities, significantly enhanced through investments in generative AI and Microsoft Copilot integrations.
- **Fundamentals and Advanced Skills:** The course teaches the creation of basic chatbots, fundamentals of message and question nodes, system topics understanding, and variable usage.
- **Practical Applications with Power Automate:** Learners gain skills in connecting chatbots to Power Automate, enabling them to handle data from various sources, perform complex operations, and integrate these functionalities within their chatbots.

This course is ideal for building practical skills in chatbot creation and integration with modern AI technologies, making it highly relevant for individuals interested in developing advanced chatbot solutions.

Dedication. Innovation. Results.
