

Client Story

HR Onboarding Application

Problem

The client needed help managing their onboarding tasks throughout the year for new hires. They have 100+ new hires each month, so needed an application to manually handle this.

Solution

Our team put together an application for the client's HR department. We used a PowerApp and back ended it with SharePoint & Power Automate, and then developed a Power BI dashboard. This gives insights to HR for all tasks completed by region, supervisor, etc. ... Any tasks not completed would also show up in this dashboard.

Results

1. Improved Employee Engagement
2. Faster Time-to-Productivity
3. Consistent Onboarding Experience
4. Increased Retention
5. Enhanced Employer Brand
6. Improved Compliance
7. Better Data Management
