LOW-CODE GOVERNANCE WORKSHOP

LOW-CODE GOVERNANCE STRATEGY

A structured, three-phase engagement designed to help you build a secure, scalable, and effective governance framework for Microsoft Power Platform—equipping your organization for sustainable low-code adoption and operational excellence

1 ASSESS & ALIGN

- Review current low-code readiness
- Identify governance and operational risks
- Gather insights specific to your environment

2 STRATEGIZE & EMPOWER

- Learn platform governance best practices
- Outline a plan to establish a Center of Excellence
- Define a vision for community enablement

3 DEFINE & ARCHITECT

- Build a secure, scalable governance strategy
- Develop a roadmap for adoption and oversight
- Establish a foundation for long-term success

ABOUT THIS WORKSHOP

Covenant's Low-Code Governance Strategy Workshop helps organizations establish a scalable, secure, and manageable foundation for Microsoft Power Platform adoption. This session guides you through defining governance, security, and operational strategies—empowering your teams to innovate confidently while maintaining control and visibility across the platform.

WHAT WILL I LEARN?

- **A Tailored Governance Plan:** Develop a governance framework specifically aligned to your organization's structure, goals, and risk profile.

- **A Strategy for Building a Center of Excellence (CoE):** Learn how to establish a CoE to drive consistency, provide guidance, and empower your makers.

- **Best Practices and Scalable Frameworks:** Gain access to proven models and methodologies that support long-term success.
