DESCRIPTION

Operating and commercial models in the cloud are different. Are you confident your cloud governance, cost control, security and compliance are being managed optimally?

Microsoft's ever evolving Azure cloud platform provides more than 200 products and services to solve today's challenges and create the future. With Azure you can build, run and manage applications across multiple clouds, on-premises and at the edge, with the tools and frameworks of your choice.

cubesys is one of Australia's leading, Azure certified, partners offering optimisation services to ensure you get the most out of Azure. Using CloudClarityTM we will share our deep understanding of Microsoft Azure billing engine; the Cloud Adoption framework and Well Architected frameworks allow us to provide actionable insights to optimise your environment.

This three-day review of Azure will provide you with actionable items and provide a way of keeping your cloud governance and cost in control. Our experienced experts have all the right knowledge to provide you with:

-  Cost optimisation guidance
-  Validate against Cloud Adoption and well architected frameworks
-  Uncover security improvements
-  Setup of CloudClarity to manage cloud governance and cost ongoing.
