CoPilot for M365
Data Readiness
Assessment

AT A GLANCE

Across all industries the fast, successful and above all safe adoption of CoPilot for M365 will be a major competitive differentiator. Is your data safely located and securely ready for your staff?

YOUR EVERYDAY AI COMPANION

Elevate creativity and innovation with Copilot for Microsoft 365, seamlessly integrated across the suite of Microsoft 365 apps. Copilot collaborates within familiar tools like Microsoft Teams, Word, Excel, PowerPoint, Outlook, Loop, and more, unleashing the potential of next-generation AI at your fingertips. Transform your AI experience within the trusted productivity apps you rely on daily. Copilot for Microsoft 365, powered by extensive language models and fueled by your data in the Microsoft Graph, converts natural language into a formidable productivity tool. With real-time access to your business data, Copilot is grounded in both content and context, propelling your efficiency to new heights.

DATA READINESS

We're here to work together to build your confidence in CoPilot and the unlock the potential it holds for your organisation.

To help you safely and successfully adopt we need to ensure your M365 environment and the data it holds are ready for CoPilt and the power of AI.

CoPilot Built-in Security

- Copilot inherits your existing Microsoft 365 security, privacy, identity and compliance policies.

- Your data is logically isolated and protected within your Microsoft 365 tenant, and always within your control.

- At the tenant level, Copilot respects individual and group permission policies.

The cubesys Copilot Data Readiness Assessment will be completed over a 10-day period and provides a comprehensive review of your existing data governance policies and configurations with recommendations on any identified remediations. We will provide a full review of the following components of Microsoft 365 and your Copilot Readiness:

- ✓ Microsoft 365 Apps for enterprise
- ✓ Microsoft Entra ID automation
- ✓ Microsoft OneDrive
- ✓ Microsoft Outlook
- ✓ Microsoft Teams
- ✓ Network requirements
- ✓ License requirements

Copilot will only work with data that is in the cloud.
We'll review your current on-prem/legacy systems and design a pathway to migrate your data and information.

Our team will help you build structure for strong content governance. Review existing content and governance controls, and create content governance plan/strategy.

Whether you chose our Copilot Readiness Assessment, or just want to talk to the cubesys team about optimising your M365 environment we're here to help you realise value with Copilot, making sure you're not left behind.
