Convert Numerous OneNote Files

OneNote File Converter is proficient to convert multiple OneNote files to another format at once. The software provides dual options that enable to upload batch data like select files and select folder. This is how users can convert multiple as well as single OneNote file to another file format at once.

Convert OneNote to Popular Formats

OneNote Notebook Converter supports to convert OneNote file to saving options such as HTML, PDF, Image, BMP, DOC, JPG, DOCx, PNG, TIFF, GIF, DOC, and XLS. The software also provides saving options .onepkg to .one.

100% Reliable Solution

It is completely safe to choose this method, as it works in offline mode. Hence, it is not mandatory to put data on server. This tool makes it feasible to upload batch data (.one files and .onepkg), and able to convert them in minimal time with complete accuracy.

Preserve Data Integrity of OneNote Data

OneNote Converter converts .one files to another format while keeping the components (heading, formatting, tables, images, table and other information) of OneNote same. And the data hierarchy and folder structure will also be the same in the resultants.

Support all OneNote Editions

The tool supports Microsoft OneNote files like .one files and .onepkg files. Also it is also supports editions of OneNote 2010, OneNote 2013, OneNote 2016, OneNote 2003, OneNote 2007, etc. These supported editions' files can be convertible to the desired format.

Independent Mechanism

OneNote File Converter enables to export/convert .one files to any format independently. It does not make it mandatory to take support from Microsoft OneNote and other Adobe programs. As this is a standalone mechanism for the conversion of .one files.

Provide Resultants Specifically

The tool works in a proper organized manner, it provides resultants files accordingly. It is like if you want to select and convert 1000 .one and .onepkg, then it will provide 1000 output files. And if you want to convert a single .one file and .onepkg then it will create a single resultant.

Provide Option to Browse Location

OneNote Converter Tool provides advantage of selecting destination path for the resultant files. In case of no selection then the output data get automatically saved in the desktop. This will prevent effort from finding the output after completion of the conversion.
