

Remove Owner Password Protection with ease

PDF Password Remover Tool provides instant solution to remove password restrictions with ease. You don't need to remember the permission (Owner) password, as the software is designed in such a way that it automatically and efficiently strips of all kinds of document restrictions from PDFs. The software is capable of enabling all PDF restrictions such as editing, copying, printing, page extraction, comments, form filling, signing and more.

Unlock User password protected files efficiently

CubexSoft PDF Unlocker Tool is designed to remove both owner and user password restrictions from PDF files. The software will prompt you to enter the user password for each selected PDF (if they have) to unlock the PDF and remove all password restrictions instantly. Tool will create a new copy of the file – free from all kinds of restrictions and password protections.

Unlock multiple PDF documents in batch

PDF Unlocker Tool enables users to remove PDF restrictions from unlimited PDF files in batch using Select Files and Select Folders buttons. The tool provides seamless solution to unlock PDF protection from all PDF files/folders in single processing. Moreover, the tool maintains to keep the folder hierarchy in exact manner.

Option to Remove unwanted files from panel

Mistakenly added some PDF files that still need to be password protected? Don't worry! Just use Remove button and the software will remove the selected file instantly. Or you can even use Remove All button to remove all PDF files at once and start the process again.

Save Output files at chosen location

The software always creates a new folder to save resultant files at default location (Desktop). However, you can change this location to any other location of your choice on your system hard drive, if you want to. Just Click on the Change button and navigate to destination location where you want to save files and press OK button.

Stand-alone application

PDF Unlock Tool is completely stand-alone utility that works on its own. No other application is required to run this tool and it generates accurate output results. Acrobat Reader is only required for opening and reading PDF documents, but not during the PDF unlock process.

Maintains data integrity

PDF Password Remover Tool maintains to keep complete data integrity throughout the process. There is not a single bit of data alteration done to the PDF files. Even original formatting layout is exactly maintained by the software.

Automatically opens output folder location for easy accessibility

Once the process is successfully finished, software opens a prompt window showing the message "Process completed successfully". As you click on OK button, the destination folder location will automatically open showing the output files. The software ensures that you save your time and energy, as you don't need to memorize the exact location that you chose during the process.

Easy to use application

PDF Restriction Remover Tool carries a simple GUI and will offer ease of working to all users. No matter whether you are a technical user or not, it provides seamless working procedure to unlock PDF restrictions.
