CYBERCOACH

SAFE SPACE FOR CYBERSECURITY LEARNING AND SUPPORT FOR EMPLOYEES

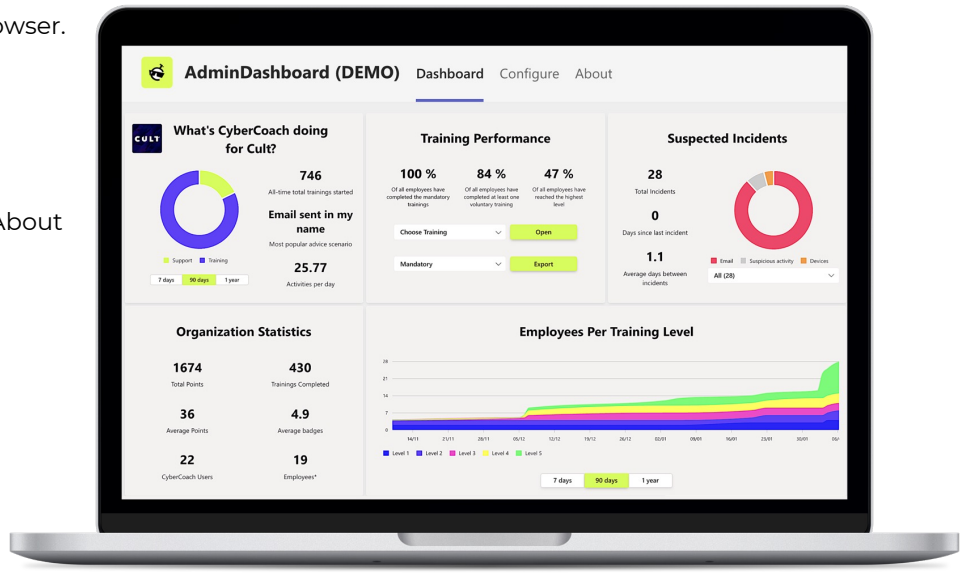
CyberCoach is the easiest, most cost-effective solution for building employee cybersecurity skills.

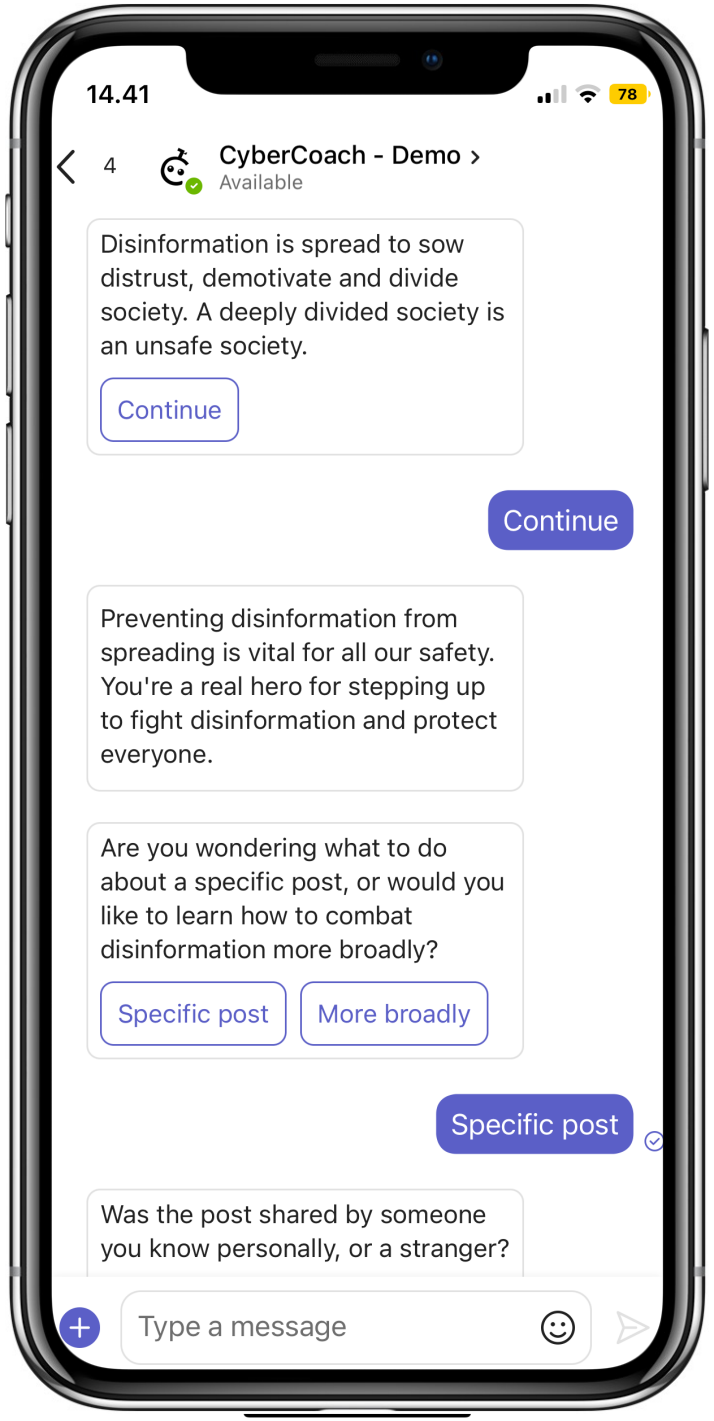
Employees play through real-life cyber attacks as either victims or cybercriminals in 2–3 minute scenario games directly in Teams/Slack chat. CyberCoach is a serious benefit to employees with 24/7 anonymous support and content for the whole family.

Starting at 0.99 € / user / month.

Available for Microsoft Teams, Slack and or in any browser.

- Anonymous Support for Employees 24/7
- Coaches Employees Support Those They Care About
- Effective and Comprehensive Training Library
- Actionable Insights: Incidents & Awareness
- Develop & Measure Security Culture
- Also covers GDPR & Data Privacy
- #1 User Experience





CyberCoach teaches stuff you actually want to learn about... in a safe space

82% employees find CyberCoach useful and that's just a start.

You get to play a cybercriminal in the dark web.

You get to learn about the surveillance tentacles of an authoritarian state.

You learn how to have the difficult conversations with children and elderly that you need to have to keep them safe.

... and much more.

Ransomware

Possible confidentiality breach

Layered protection Back

Layered protection

After this training:

You know about anonymity online and how easy it is to buy professional hacking services, and how to create a layered defense against them.

In this advanced scenario, the roles are reversed. Instead of being the target, you are the cyber criminal.

A lost soul with sinister motives, attempting cybercrime for the first time. You're not quite sure what you want, and you don't really have a clue how you would go about getting it either.

Now you have their Twitter password, phone number and email. Now if you wanted money, you could try different things.

Which do you think you should do first?

- ◯ Call and blackmail them
- ◯ Try to log into their email
- ◯ Send them malware
