CumulusPro Expense Claims app
Cloud-based expense management solution

A web and mobile expense management solution that helps businesses ensure employees comply with corporate HR policy, and where employees and managers can submit or approve claims for reimbursement without hassle.

Simple, convenient, effective

WHAT WE OFFER

Automatic compliance
Shift from reactive to proactive compliance management by embedding corporate policies into in-policy data checks and multi-level approval matrix. Complex corporate policies can be easily transformed into consistent business rules checks in the claims approval process by using the Expense Claims app.

Improve expense visibility
Gain visibility into employees' spending with data insights and process transparency. This allows the finance teams and managers to have better budget control.

Fast approval with notifications
Approving managers are notified when their employee claims need their approval, and it's easy for managers to log in and approve claims online.

Save time and cost
Minimise time and effort spent on expense claims submission with expense claims web and mobile app. Employees can capture the receipts on-the-go and submit their claims immediately. No more lost or damaged receipts.

WHAT OUR CUSTOMERS ARE SAYING

"In the past, our sales team spend a great deal of time preparing their personal expense reports. Now receipts are captured together with the expense reports using their mobile devices. No more lost receipts, and manager approvals and reimbursements are always on time."

- SALES DIRECTOR, Beverage Distributor in Asia
