

Our **Microsoft 365 Copilot Readiness Assessment** is an analysis that is designed to help organisations **evaluate their preparedness** for deploying and **successfully adopting Microsoft 365 Copilot**.

Compatibility Check

The Assessment involves examining your existing Microsoft 365 environment to ensure compatibility with Copilot's requirements, including information governance, security configurations, and access controls.

Security

We will thoroughly evaluate the quality of your existing data and data infrastructure to identify potential data privacy or security concerns.

Fully understanding Copilot's potential and implementing it effectively will ensure your organisation maximises its benefits.

The Assessment

A Microsoft 365 Copilot Readiness Assessment is a smart investment for any organisation considering adopting this powerful tool.

By taking the time to assess your environment, you can increase your chances for a successful implementation that makes the most out of your Copilot investment.

Your Microsoft 365 Copilot Readiness Assessment will include:

 Evaluating your SharePoint Information Architecture.

 Identifying areas that should potentially be excluded from Copilot's visibility.

 Carrying out a security analysis on available content, highlighting any areas that may need securing.

 Assessing the licensing model you have in place, to ensure that staff can access Microsoft 365 Copilot.

What will you gain?

A detailed report **summarising your estate** and any **associated risks** that have been discovered. We will present this back to you and along with the **appropriate recommendations**.

Benefits:

Increased user satisfaction

We will address concerns to ensure greater user satisfaction, adoption rates, and productivity gains.

Minimised risks

Evaluate common risks and learn how to mitigate security and compliance concerns.

Efficient rollout

Post-assessment, you will be able to develop an efficient deployment strategy for Copilot across your environment.

Maximised ROI

Understand what Copilot can do for your team and implement it effectively to realise immediate benefits.

Bring your organization into the modern WORLD OF AI with MICROSOFT 365 COPILOT

Ready to transform your organisation's productivity? Our Copilot experts are here to help you.

With deep knowledge of the latest Copilot developments and its potential, our Microsoft Copilot Consulting Services are designed to support you to build an AI roadmap for the future.

Copilot is now available as an add-on for most organisations using the following plans:

- Office 365 E3/E5
- Microsoft 365 E3/E5 Business
- Standard/Premium

No minimum licencing is required.

What is COPILOT and where CAN I use it?

Microsoft Copilot is essentially a compilation of AI assistants, working across the Microsoft 365 technology stack.

It's like having an AI Chatbot built into your day-to-day applications.

Users enter a prompt, and then Copilot will generate a text response, document, or data depending on your instruction.

Why C-ven?

C-ven helps organizations move from Copilot interest to informed action.

We combine:

- Deep Microsoft 365 and Copilot expertise
- Business-first productivity analysis
- Strong focus on security and governance
- Experience supporting enterprise and regulated environments

Our goal is simple: help you make the right decision before you enable Copilot.

Assessment and Deployment

Microsoft 365 Copilot Readiness Assessment

Ensure your organisation is prepared for Microsoft Copilot with our Copilot Readiness Assessment.

Through interactive workshops, our consultants will evaluate your Microsoft 365 environment, including security configurations, and identify requirements, goals, and aspirations for Copilot and AI. Proper preparation is crucial to mitigate risks like unauthorised access to incorrectly secured content.

Microsoft 365 Copilot Deployment

Building on the findings from the Readiness Assessment, our Copilot Consultants will outline next steps and propose a long-term Content AI roadmap. We'll ensure all prerequisites are met and guide you through the Copilot implementation process with precision and expertise.
