

## Modern Workplace Security Assessment

### Key Benefits

We work with your teams to understand your security goals and objectives

Assess your existing security configuration and identify gaps and risks

Maximise ROI from existing investment in Microsoft security features

Create a clear roadmap for future security investment, aligned to risk profile

Ensure delivery of key digital transformation projects is not held-up by security concerns

**“We needed security that was second to none.”**

- Stephen McCarthy, CEO & Founder, BidX1

Do you know how many phishing attacks your organization has received? Whether your employees are using the right password protocol? Whether personal data is being exposed? In short, is your organization’s cloud environment as secure as you need it to be?

### Improve your security posture with our Modern Workplace Security Assessment

Organizations like yours are managing growing volumes of data and alerts, all while dealing with tight budgets and vulnerable legacy systems. In this environment, minimizing security risks is a massive challenge. Help achieve your broader security objectives — and identify current and real threats — by scheduling a Modern Workplace Security Assessment.

Designed for today’s security stakeholders, our approach helps you to develop a strategic plan based on your the recommendations of Microsoft cybersecurity experts, customized specifically for your organizational needs. You’ll not only gain visibility into immediate threats across email, identity, and data; you’ll get valuable clarity and support on how to upgrade your security posture for the long term.

With our Modern Workplace Security Assessment you’ll get

- A list of actionable recommendations to help immediately mitigate the identified threats
- A detailed assessment of your IT and security priorities and initiatives, direct from cybersecurity pros
- An inside look at Microsoft’s holistic approach to security, and how it relates to your organization
- A hands-on opportunity to experience what integrated security looks like, including the latest tools and methods
- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps
