

DeviceGuard

Your Frontline of Defence

Secure Productivity

Securing and protecting your endpoints is the first line of defence to getting secure and staying secure. In today's contemporary workplace, a diverse range of endpoints, including mobiles, tablets, laptops, servers, IoT devices, and more, are utilised by numerous users to access corporate applications and data. Managing the security, compliance, and data protection of your business has become progressively intricate due to this diversity of endpoints.

As your trusted partner, we offer a comprehensive managed service solution tailored to support a wide array of operating systems, including Windows, Android, Chrome, Linux, iOS, macOS. Our deep understanding of endpoint management allows organisations to streamline device management processes, fortify security measures, and ensure compliance with industry regulations. Our proactive approach to monitoring and support, ensures that any issues or challenges are promptly addressed, minimising downtime and maximising productivity. This solution allows you to confidently navigate the complexities of endpoint management while focusing on core business objectives.

DeviceGuard, part of CWSI's SecureGuard managed service portfolio.

It is more than a security service – it's your first line of defence to getting secure and staying secure.

Our experts manage and secure your endpoints, proactively detecting vulnerabilities, apply patches, and enforce encryption protocols to keep your business and its data free from prying eyes.

Expected Business Outcomes:

Increase Employee Productivity - Efficiently deploy, configure, and optimise your platform to meet business requirements

Security & Compliance - Keep your devices secure from the latest cyber threats and protect corporate data by controlling how it is used and shared.

Reduced IT Burden - Monitor and support, ensuring that any issues or challenges are promptly addressed, minimising downtime and maximising productivity.

Consistency & Visibility - Manage your diverse endpoint estate regardless of operating system including MacOS, Windows, iOS and Android.

Remain Compliant - Continuous Improvement - Allowing you to concentrate on your core business without worrying about ever shifting cyber landscape.

What We Do For You

Optimisation

Advanced Platform Monitoring giving real-time insights to key data points.

Day to Day Vigilance

Maintaining your environment, ensuring your business gets secure and stays secure. Providing helpdesk to helpdesk support for your business.
