# Secure365 Managed Service- Securing the Modern Workplace

CWSI.

**Our purpose is to help  
organisations thrive,  
and stay secure, in a  
mobile world**

# Modern Security is in our DNA

Leaders in enabling & securing the modern security workplace in a mobile-first world.

## Microsoft Expertise

Work with **Microsoft** to support customers in adopting and securing Microsoft's **Modern Workplace** solutions.

Microsoft  
Expertise

Mobile  
Heritage

Security Focus

## Mobile Heritage

We've been helping organisations to enable and secure mobile users for over a decade.

## Security Focus

We're not a generalist. Our focus is on empowering organisations **to securely deliver data and applications** to employees on any device, from anywhere.

*As one of our top partners in this area, our recommendation would be to speak to CWSI, with their depth of capability they will be able to help you assess where you are and how to get started on a journey to a zero-trust posture.*

# Modern Security Management

Security management is a continuous process.

## Get Secure

Our consulting team will work with you to understand your security requirements, identify where Microsoft's security technology can deliver and design and deploy a solution tailored to your needs.

- Security Workshops
- Security Assessments
- Secure Solution Design
- Managed Solution Deployment

## Stay Secure

Our Managed Service is built to proactively manage, maintain and improve your Microsoft security policies, ensuring you benefit from the full range of available tools and strike the right security balance.

- Secure Identity
- Secure Devices
- Secure Applications
- Secure from Threat

# Consulting & Professional Services

Accredited and trusted by Microsoft.

## Security Workshop

A hands-on opportunity to experience what integrated security looks like, including the latest tools and methods with recommendations from our experts about your security strategy.

- ✓ Gain visibility into immediate threats
- ✓ Get clarity and support on how to upgrade your security posture for the long term

## Secure Design

Our Microsoft Security experts will create your EM+S environment, based on industry best-practice and bench-marked against your security policies and regulatory requirements.

- ✓ Right-first time design
- ✓ Remove security barriers to digital transformation

## Security Assessment

We work with your teams to understand your security goals and objectives, assess your existing security configuration, identify gaps and risks and create a clear roadmap for the future.

- ✓ Align business technology strategy
- ✓ Build the foundation for secure design

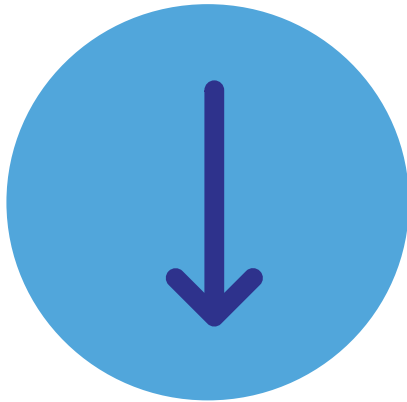

## Managed Deployment

Our service desk team can help your employees transition from legacy solutions to modern managed security, with migration tools, clinics, hyper-care and VIP options.

- ✓ Superior user experience
- ✓ Faster adoption and realisation of benefits

# Secure365 Managed Service

Why a modern managed security service makes sense

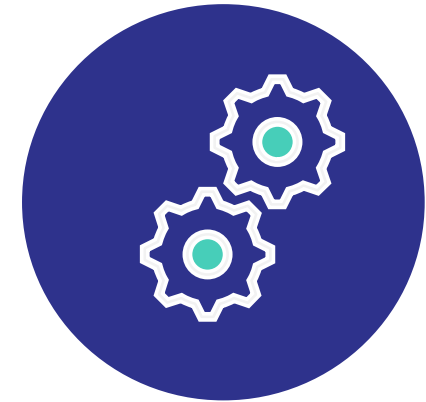

## Reduce Risk

Our experts proactively monitor & manage your EM+S configuration, making recommendations to continuously improve your security posture, and reduce the risk of breach, without impacting usability.

## Improve Return

We work with you to enable the EM+S features that make sense for your business. We keep you up-to-date with recommendations on new and enhanced features, meaning you get better value from your software.

## Gain Efficiency

We're specialists in modern security. Our team handle all adds, moves and changes to the configuration of your environment, ensuring it's done quickly and done right-first-time..We enable your team focus on what they do best.
