

Microsoft Secure365 Managed Service

CWSI's Secure365 Managed Security Service

CWSI are leaders in enabling and securing the modern security workplace in a mobile-first world. Modern Security is in our DNA. We are not a generalist. Our focus is on empowering organisations to securely deliver data and applications to employees on any device, from anywhere. We work with Microsoft to support customers in adopting and securing Microsoft's Modern Workplace Solutions. Our mobile heritage is based on helping organisations to enable and secure mobile users for over a decade.

Secure management is a continuous process, and our managed service achieves that by helping you GET SECURE and then STAY SECURE. Our consulting team will work with you to understand your security requirements, identify where Microsoft's security technology can deliver and design and deploy a solution tailored to your needs. Our Managed Service built to proactively manage, maintain and improve your Microsoft security policies, to ensure you benefit from the full range of available tools and strike the right security balance.

Customer benefits

- **REDUCE RISK:** Our experts proactively monitor and manage your EM+S configuration, making recommendations to continuously improve your security posture, and reduce the risk of breach, without impacting sustainability.
- **IMPROVE RETURN:** We work with you to enable the EM+S features that make sense for your business. We keep you up-to-date with recommendations on new and enhanced features, meaning you get better value from your software.
- **GAIN EFFICIENCY:** We're specialists in modern security. Our team handle all adds, moves, and changes to the configuration of your environment, ensuring it's done quickly and done right-first-time. We enable your team focus on what they do best.
