The GDPR portal

The Cyber Basics GDPR compliance management portal is an online solution that brings together the core requirements of the General Data Protection Regulation (GDPR). It provides a structured approach to managing privacy compliance and implementing effective data protection practices within your organization.

A solid foundation of predefined policies, registers, and procedures is ready for immediate use. You can easily supplement the system with your own documents, data flows, and processing activities.

Key features:
- Insight into GDPR obligations and responsibilities
- Clear structure,for implementing privacy controls
- Continuous documentation of processing activities
- Management dashboards for compliance status and progress
- Direct evidence for audits and accountability
- Flexibility to adapt to future changes in your organization or legislation
